

SUMMARY

Introduction :

The ramification system is one of the most important problems which affect greatly on the present secondary education in Al-Azhar and on the university education in Al Azhar generally in future one of the previous studies stiggested to make a field research at once to know many aspects about this matter ramification in the secondary Education in Al Azhar and how it is suitable for meeting the needs of Al Azhar faculties of students .

So it is necessary to make a field study about this, and know its relation to Al Azhar faculties needs of students and trying to get the suitable solution for this problem .

The research problem :

The research problem can be presented as follows :

- 1- What is the present status of the ramification system in the secondary education in Al-Azhar .
- 2- What are the most important problems related to the ramification system in the secondary education in Al-Azhar ?
- 3- What is the relationship between the ramification system in the secondary education in Al-Azhar and the needs of Al Azhar faculties of students ?
- 4- What are the methods that can be used for developing the ramification system in order to meet the needs of Al Azhar faculties of students ?

The Importance of the Research :

This research is very important because of newness of the ramification system in Al-Azhar and its inefficiency to meet the needs of Al-Azhar faculties of students.

The Research Aims :

- 1- Recognizing the present status of ramification in the secondary education in Al Azhar.
- 2- Defining the problems related to the present ramification system in the secondary education in Al Azhar.
- 3- Studying the relationship between the ramification system and the needs of Al Azhar faculties of Students .
- 4- suggesting some recommendations that contribute in developing the ramification system to meet the needs of Al-Azhar faculties.

Research Method :

The researcher used the descriptive method because it is suitable for the present study

Limitation :

This research studies the present status of the ramification system in the secondary education in Al Azhar and its relationship to the needs of Al Azhar faculties of students .

The research Instruments :

Data made on a sample of officers of secondary education and another on the university staff members to recognize the effect of ramification on them, to know their suggestions due to its high development in Al-Azhar university.

Research Terms :

Ramification : It is a main method for organizing Al Azhar Education on the base of dividing fields where the student can choose among them as he desires.

Research Steps :

The researcher followed the following steps :

- 1- The research problem .
- 2- The present status of the ramification system in the secondary education in Al Azhar.
- 3- The needs of Al Azhar faculties of students.
- 4- The field study .
- 5- Results and recommendations .

Results :

- 1- The inability of the ramification system in achieving its aims.
- 2- The absence of the scientific bases affecting them.
- 3- Disagreement on the ramification in the first grade.
- 4- The syllabuses of every department .
- 5- Making no way to students for choosing .
