Introduction	1
Chapter I	
Anatomy.....	3
1- Anatomy of Femoral Shaft	3
2- Blood Supply of Femoral Shaft	6
Chapter II	
Biomechanics	9
Biomechanics of Femoral Bone	9
Biomechanics of Intramedullary Nailing	12
Biomechanics of Interlocking Nailing	15
Chapter III	
Effects Of Reaming And Intramedullary Nailing In Fracture Healing	19
Biological Factors	20
Mechanical Factors	21
Reaming	23
Fracture Healing Following IM Nailing	24

	Page
Chapter IV	
Classification of Femoral Fractures	26
Winqvist Classification	26
A.O bone Classification	28
Classification of Soft tissue injuries According to AO Group.	31
Chapter V	
Treatment Alternatives of Femoral Shaft Fractures	33
Chapter VI	
Indications and Contraindications of Interlocking Nailing	50
Indications	50
Contraindications	56
Chapter VII	
Technique	57
Timing	57
Patient Positioning	59
Surgical Approach	62
Guide Wire Insertion	63
Nail Insertion	66
Proximal Locking	66
Distal Locking	67
Post operative Management	70
Chapter VIII	
Complications	73
Intra Operative Complications	74
Post operative Complications	78

	Page
Chapter IX	
Summary	84
Chapter X	
References	88
