APPENDIX	129
ARABIC SUMMARY	

LIST OF TABLES

Table (1) : Prevalence of low back pain in the study and control groups	81
Table (2) : Statistical analysis of low back pain in the study and control groups	82
Table (3) : Comparison between causes of low back pain in the study and control groups	83
Table (4) : Radiological changes in the study and control groups	84
Table (5) : Mean values of measurement of normal vertebrae from thoracic 11 to lumbar 5 as regards wedge, biconcavity and compression	85
Table (6) : Mean values of measurement of vertebrae of control group from thoracic 11 to lumbar 5 as regards wedge, biconcavity and compression	86
Table (7) : Mean values of measurement of vertebrae of the study group From thoracic 11 to lumbar 5 as regards wedge, biconcavity and compression	87
Table (8) : Comparison between the number of vertebral deformities in the study and control groups	88

LIST OF FIGURES

Figure (1-1) : wedge deformities in the normal vertebrae, the vertebrae of control group and the vertebrae of the study group	89
Figure (1-2) : Biconcavity deformities in the normal vertebrae, the vertebrae of control group and the vertebrae of the study group	90
Figure (1-3) : Compression deformities in the normal vertebrae, the vertebrae of control group and the vertebrae of the study group	91
Figure (2) : Distribution of vertebral deformities in different sports	92
Figure (3) : Shows fracture of pars interarticularis and spondylolisthesis.	93
Figure (4) : Shows fracture of pars interarticularis and spondylolisthesis.	94
Figure (5) : Shows loss of lumbar lordosis.	95
Figure (6) : Shows scoliosis.	96
