1. INTRODUCTION	1
2. REVIEW OF LITERATURE	6
2.1. The Environmental Impacts of Chemical Insecticides Used in Mosquito Control	7
2.2. Mode of Action of Tested Herbicides	13
2.2.1. Mode of action of thiocarbamate compounds ..	13
2.2.2. Mode of action of dinitroaniline compounds .	14
2.2.3. Mode of action of amides groups	14
2.2.4. Mode of action of oxadiazole compounds	14
2.3. Herbicides and the Environment	15
2.3.1. Herbicides interaction with phytopathogens and plant parasitic nematodes	15
2.3.2. Impact of herbicides on insects	16
2.4. Predaceous Aquatic Insects As Regulatory Factor for Mosquito Population Suppression	21
2.5. Nematodes As Biological Control Agents for Mosqui- toes	23
2.5.1. Toxin production by axenic insect parasitic nematode <u>N. carpocapsae</u>	25
2.5.2. Immune response of insect host to entomo- genous nematodes	29
2.5.3. Movement of entomogenous nematode <u>N.</u> <u>carpocapsae</u>	34
2.5.4. Possible effect of entomogenous nematodes on non-target invertebrates	36
2.5.5. Effect of chemical pesticides on entomo- genous nematodes	38
3. MATERIALS AND METHODS	43
3.1. Rearing of <u>Culex pipiens</u>	43
3.2. Collecting Mosquito Predators and Other Aquatic Insects from Their Natural Habitats	44
3.3. Maintaining Mosquito Predators in the Laboratory ..	47

CONTENTS : Cont'd.

	<u>Page</u>
3.3.1. The notonectid backswimmer, <u>Anisops sardes</u> H.S.	48
3.3.2. The corixid waterboatman, <u>Sigara mayri</u> Fieb.	48
3.3.3. Odonata nymphs, <u>Crothemis erythraea</u> Brull. and <u>Ischnura senegalensis</u> Ramb.	48
3.4. Other Aquatic Insects	49
3.4.1. May fly nymphs, <u>Polymetarcys</u> sp.	49
3.4.2. Chironomid midges, <u>Chironomus</u> sp.	49
3.5. Propagation of the Entomogenous Nematode <u>Steinernema feltiae</u> Wouts (<u>Neosaplectana carpocapsae</u> Weiser)	50
3.6. Laboratory Experiments for Testing the Insecticidal Effect of Herbicides Against Mosquitoes and Other Aquatic Insects.....	52
3.7. Susceptibility of Mosquito Larvae and Mosquito Predators to <u>N. carpocapsae</u>	56
3.8. Effect of Tested Herbicides on the Entomogenous Nematode <u>N. carpocapsae</u>	57
3.9. Settling Rate of the Entomogenous Nematode <u>N.</u> <u>carpocapsae</u> in Water	58
3.10. Effect of Herbicides on Adult Mosquito	59
4. RESULTS AND DISCUSSION.....	61
4.1- Testing the insecticidal effect of herbicides against mosquitoes	61
4.1.1. Effect on egg rafts	62
4.1.2. Effect of larvae	62
4.1.3. Effect on pupae	67
4.1.4. Effect on adults	68

CONTENTS : Cont'd.

	<u>Page</u>
4.2- Impact of the Tested Herbicides on Mosquito Predators and Other Aquatic Insects	70
4.3- Susceptibility of <u>C. pipiens</u> Larvae to the Infective Juveniles of the Entomogenous Nematode <u>N. carpocapsae</u>	87
4.4- Effect of <u>N. carpocapsae</u> on Certain Mosquito Predators and Other Associated Aquatic Insects	91
4.5- Effect of Tested 5 Herbicides on the Infectivity of <u>N. carpocapsae</u>	103
5. CONCLUSION	107
