	Page
INTRODUCTION AND AIM OF THE STUDY	1
REVIEW OF LITERATURE.. .. .	3
CLASSIFICATIONS OF BONE TUMOURS	3
CANCER IMMUNITY	17
DIAGNOSIS OF MALIGNANT BONE TUMOURS	20
Clinical approach for diagnosis	24
Laboratory tests (changes in serum chemistry)	28
Tumour markers	30
Imaging techniques	32
- Plain X-ray	33
- Skeletal scintigraphy	48
- Conventional tomography	53
- Computed axial tomography	54
- Nuclear magnetic resonance	61
- Angiography	72
- Xeroradiography and xero-arteriography	73
- Adaptive histogram equalization in digital radiography of destructive skeletal lesions	74
- Sonography	75
- Arthrography	75

	Page
Biopsy techniques	76
Value of electron microscopy in the study of bone tumours	81
Value of histochemistry in diagnosis of bone tumours..	81
Flow cytometry	82
SURGICAL GRADING OF MALIGNANT BONE TUMOURS ..	86
TREATMENT OF MALIGNANT BONE TUMOURS ..	94
- Principles of surgical management	95
- Limb-sparing procedures	96
- Pulmonary surgery	105
- Amputation	106
- Cryosurgical treatment	108
- Chemotherapy	110
- Radiation therapy	113
