

CONTENTS

I. INTRODUCTION-----	1
II. REVIEW OF THE LITERATURE-----	4
2.1. Susceptibility of <i>S. gregaria</i> to entomopathogenic nematodes-----	4
2.2. Thermotolerance-----	16
2.3. Effects of relative humidity -----	22
2.4. Immunological and biochemical studies-----	26
III. MATERIALS AND METHODS-----	37
3.A. Test insects-----	37
3.A.1. Origin of the colony-----	37
3.A.2. Maintenance of the culture-----	37
3.A.2.1. Description of rearing cages-----	37
3.A.2.2. Rearing technique-----	37
3.B. Entomopathogenic nematodes (EPN)-----	38
3.B.1. Sources of tested nematodes-----	38
3.B.2. Mass rearing of entomopathogenic nematodes-----	38
3.C. Effect of EPN on <i>S. gregaria</i> -----	41
3.C.1. Experimental insects-----	41
3.C.2. A preliminary test-----	41
3.C.3. Application technique-----	41
3.C.4. Criteria studied-----	42
3.C.4.1. Mortality reading and observations-----	42
3.C.4.2. Time taken to kill 50% of insects (LT ₅₀)-----	42
3.C.4.3. Establishment-----	42
3.C.4.4. Propagation potential of nematodes in the pest-----	42

3.C.5. Temperature effects-----	43
3.C.5.1. Effect of temp. on the nematode survival-----	43
3.C.5.2. Effect of temp. on the nematode pathogenicity-----	43
3.C.5.3. Effect of temp. on the nematode establishment-----	44
3.C.5.4. Effect of temp. on the span of nematode life cycle-----	44
3.C.5.5. Effect of temp. on the nematode propagation-----	45
3.C.6. Relative humidity (RH) effects-----	45
3.C.6.1. Effect of different RHs on the nematode survival---	45
3.C.6.2. Effect of different RHs on the nematode pathogenicity -----	45
3.C.7. Immunological studies-----	46
3.C.7.1. Cellular immune response-----	46
3.C.7.1.1. Differential haemocyte counts (DHCs)---	46
3.C.7.1.2. Estimation of phagocytosis.-----	47
3.C.7.1.3. Total haemocyte counts (THCs)-----	47
3.C.7.2. Humoral immune response (the agar-well diffusion technique).-----	47
3.C.8. Biochemical studies-----	48
3.C.8.1. Insects used for chemical analysis-----	48
3.C.8.2. Sample collection and purification-----	48
3.C.8.2.1. Haemolymph collection-----	48
3.C.8.2.2. Haemolymph purification-----	49
3.C.8.3. Total protein determination-----	49
3.C.8.3.1. Reagents-----	49
3.C.8.3.2. Procedures-----	50
3.C.8.3.3. Calculations-----	50
3.C.9. Statistical analysis-----	51
3.C.10. Semifield experiment-----	51

IV. RESULTS-----	52
4.1. Susceptibility of <i>S. gregaria</i> to entomopathogenic nematodes-----	52
4.2. Rate of <i>S. gregaria</i> mortality by entomopathogenic nematodes-----	68
4.3. Establishment-----	68
4.4. Nematode propagation-----	73
4.5. Temperature effects-----	82
4.5.1. Effect of temperature on survival-----	82
4.5.2. Effect of temperature on pathogenicity-----	86
4.5.3. Effect of temp. on time required to kill 50% of insects-----	91
4.5.4. Effect of temperature on establishment-----	91
4.5.5. Effect of temperature on span of nematode life cycle-----	94
4.5.6. Effect of temperature on reproduction -----	94
4.6. Relative humidity (RH) effects-----	98
4.6.1. Nematode survival at different RHs-----	98
4.6.2. Nematode pathogenicity at different RHs-----	101
4.7. Cellular immune response-----	104
4.7.1 Differential haemocyte counts-----	104
4.7.2. Phagocytosis-----	110
4.7.3. Total haemocyte counts-----	113
4.8. Humoral immune response-----	124
4.9. Effect of nematodes on haemolymph protein content-----	124
V. DISCUSSION-----	131
VI. SUMMARY-----	150
VII. REFERENCES-----	153

ARABIC SUMMARY.
