SUMMARY

The Holy Quoraan contains many educational methods with various purposes and each of them has its own importance and suitable use. If we want to have a comprehensive educational reformation, we should go back to the Holy Book to reveal these methods and to form them in a practical way. The application of these methods in our educational system will help in the achievement of its objectives effectively.

Research Problem:

The research problem can be formulated in the following main question:

- How can we use some Islamic educational methods in the Holy Quoraan in raising the Islamic personality?

This main question contains the following sub-questions:

1- What is the common form of the educational methods in the practical field?

2- What are the characteristics of the debate method in Islamic education? What are its educational applications?

3- What are the characteristics of worships method in Islamic education? What are the educational values involved in this method?

4- What are the general chracteristics of the proverbs method in the Holy Quoraan? How can it be applied educationally?

Research Objectives:

The present research aimed at the following:

1- The investigation of one of the most important sides of the Islamic educational philosophy in the light of the Holy Quoraan and using it in the reformation of our educational system.

2- Revealing the value of debate and its educational importance in the investigation of facts and reaching the aims through strengthening the relations between the teacher and the student.

3- Identifying the role of practical practice through worships in directing behaviour in a way that helps in the reformation of the educational system.

4- Focusing the value of the proverbs method in achieving the objectives of the educational process.

Research Scope:

The present study focuses the following educational methods:

1- The method of debate.
