

with this age class , but there was a shortage at administration of Al – Walaa resort .

However , we have some recommendations and suggestions that should be ensured :

First : supporting the non – governmental organizations which supervise the old aged resorts and providing the organizations with social and medical methods , the proper choice of location of the organization is very important .

Second : training social works on this field and preparing professional cardres with the advanced age groups so as to improve their ability to overcome any problem which may face them .

Third : continuing the process of joining the old with their families , training the old on new skills , creating alternative rules which suit their organization . allowing them to participate in national associations to let them contact with younger people .

Fourth : the important of multimedia to readjust the negative trend towards old aged resort which become a necessity after the family reformation , and its importance to spread the awareness of its importance taking care of people and informing them of the their age period they pass through .

these organizations , and how far they accept them . finally , observing factors which strengthen the relationship among the settlers and between them and old aged resorts as a social organization .

Regarding the method of this research , it depended on analytical descriptive method which provides a proper knowledge of the advanced age groups and taking notes about their behaviour and their interaction with the organization . so data collecting methods were divided into case study and making interviews with chosen cases .

As for the results , the field research uncovered the reasons of the old to join these organization in research community (Al – Amal old aged resort in Mansoura and Al – Walaa old aged resort in Meet Ghamer) in addition , the results have shown that there was a relationship between age and the trend to settle at old aged resort as the age class (60:79) was the first class in rank which tended to live in an old aged resort in both research communities . the research also declared that the most common social status in Al – Amal resort is widows on other hands , married is the most common one in Al – Walaa resort .

The research revealed that most settlers in both research communities have a convenient degree of social interaction and could practically join in social , cultural , and recreational activities that suit them . it revealed also their ability of social adaptation and overcoming the problems and pressures they faced ,but less of them could reach this advanced stage .

The research revealed also that the old aged resorts could achieve expected results and improved all social , cultural , healthy , and recreational activities at a suitable standard . besides , the administrative system of Al – Amal resort is highly qualified and well trained to deal
