CHAPTER I	
INTRODUCTION AND AIM OF THE WORK.	
Introduction.....	1
Aim of the work.....	7
CHAPTER II	
LITERATURE REVIEW	
Literature review.....	8
CHAPTER III	
MATERIALS AND METHODS.	
1- Study areas.....	17
2- Taxonomical studies of collected samples.....	19
3- Anatomical investigation.....	19
4- Sperm ultrastructure.....	19
5- Ecological investigation.....	20
5-1- Physico-chemical parameters determination.....	20
5-1-1- Water temperature (°C).....	20
5-1-2- Hydrogen ion concentration (pH).....	20
5-1-3- Salinity (‰).....	21
5-1-4- Dissolved oxygen (DO).....	21
5-1-5- Biochemical oxygen demand (BOD).....	22
5-2- Determination of heavy metals.....	22
5-2-1- Heavy metals in surface sea water.....	22
5-2-2- Heavy metals in limpet soft tissues.....	22
5-3- Collection of samples for the ecological studies.....	23
5-3-1- Species diversity (H'), evenness (J') and richness (SR).	24
6- Statistical analysis.....	25
7- Histopathological investigation.....	25
CHAPTER IV	
RESULTS & DISCUSSION	
1- Taxonomical studies of collected samples.....	27
2- General description of dominant species.....	50
2-1- Description of <i>Patella caerulea</i>	50

CONTENTS / CONT.

	Page
2-2- Description of <i>Diodora italica</i>	56
2-3- Description of <i>Siphonaria kurracheensis</i>	60
Discussion	75
3- Sperm ultrastructure of some investigated species.....	80
3-1 The sperm of <i>Patella caerulea</i>	80
3-2 The sperm of <i>Diodora italica</i>	81
3-3- The sperm of <i>Siphonaria kurracheensis</i>	82
Discussion	93
4- Ecological investigation.....	97
4-1- Physico-chemical parameters of water.....	97
4-1-1- Temperature (°C).....	97
4-1-2- Hydrogen ion concentration (pH).....	97
4-1-3- Salinity (‰).....	101
4-1-4- Dissolved oxygen.....	101
4-1-5- Biochemical oxygen demand.....	105
4-2- Heavy metals in surface sea water.....	105
4-3- Heavy metals in whole soft tissues of <i>Patella caerulea</i>	117
4-4- Comparison between heavy metals content in surface sea water and whole soft tissues of <i>Patella caerulea</i>	129
4-5- Species diversity (H'), evenness (J') and species richness (SR).	134
Discussion	143
5- Experimental studies on the effect of Cd and Cu on some organs of <i>Patella caerulea</i>	147
5-1- Digestive gland.....	147
5-1-1- The effect of Cd on the digestive gland.....	148
5-1-2- The effect of Cu on the digestive gland.....	149
5-2- Foot.....	149
5-2-1- The effect of Cd on the foot.....	151
5-2-2- The effect of Cu on the foot.....	151
Discussion	167
SUMMARY	170
REFERENCES	174
ARABIC SUMMARY.	

LIST OF TABLES

	Page
Table (1): Limpet species and stations of collection from the rocky shores of Alexandria.	43
Table (2): Limpet species and stations of collection from the western coast of Suez Gulf, Red Sea and Aqaba Gulf.	43
Table (3): Seasonal variations in temperature (°C) of surface sea water at three stations of Alexandria during Autumn 2001 to Summer 2002..	98
Table (4): Analysis of variance (two way ANOVA) for temperature (°C) of surface sea water at three stations in Alexandria during four seasons.	98
Table (5): Seasonal variations in hydrogen ion concentration (pH) of surface sea water at three stations of Alexandria during Autumn 2001 to Summer 2002.	99
Table (6): Analysis of variance (two way ANOVA) for pH concentration of surface sea water at three stations in Alexandria during four seasons..	99
Table (7): Seasonal variations in salinity (‰) of surface sea water at three stations in Alexandria during Autumn 2001 to Summer 2002.	102
Table (8): Analysis of variance (two way ANOVA) for salinity (‰) of surface sea water at three stations in Alexandria during four seasons.	102
Table (9): Seasonal variations in dissolved oxygen concentration (mg/l) of surface sea water at three stations in Alexandria during Autumn 2001 to Summer 2002.	103
Table (10): Analysis of variance (two way ANOVA) for DO concentration (mg/l) of surface sea water at three stations in Alexandria during four seasons.	103
Table (11): Seasonal variations in biochemical oxygen demand concentration (mg/l) of surface sea water at three stations in Alexandria during Autumn 2001 to Summer 2002.	106
