|---------------------------------------------------|----|
| ABSTRACT:.....                                    |    |
| List of Tables.....                               |    |
| List of Figure:.....                              |    |
| <br>                                              |    |
| INTORDUCTION.....                                 | 1  |
| REVIEW OF LITERATURE.....                         | 4  |
| I- cultivars Identificatim.....                   | 4  |
| a- Seed protein electrophoresis.....              | 8  |
| b-Isozyme polymorphism.....                       |    |
| II- Effect of salinity.....                       | 11 |
| a- Morphological measurments.....                 | 11 |
| b- Leaf protein patterns and Isozyme profile..... | 17 |
| c- RAPD Markers.....                              | 21 |
| III- Tissues culture experiments.....             | 24 |
| a- Callus inductin and initiation.....            | 24 |
| b- Proline content.....                           | 31 |
| MATERIAL AND METHODS.....                         | 34 |
| - Material: .....                                 | 34 |
| - Methods: .....                                  | 35 |
| I- Cultivars Identification.....                  | 35 |
| a- Seed protein electrophoresis.....              | 35 |
| b- Isozyme Polymorphism.....                      | 39 |
| - Esterase isozyme profiles.....                  | 40 |
| - Peroxidase isozyme profiles.....                | 40 |
| -Got isozyme profile .....                        | 41 |
| - LAP isozyme profiles.....                       | 41 |

|                                               |    |
|-----------------------------------------------|----|
| - IPO isozyme profiles.....                   | 41 |
| C- RAPD Markers.....                          | 42 |
| II- Effect of salinity:.....                  | 48 |
| III- Tissues cultures experiment.....         | 50 |
| a- explant preparation.....                   | 50 |
| b- Callus induction and initiation.....       | 51 |
| c- Determination of proline.....              | 52 |
| IV- Statistical Procedure:.....               | 54 |
| <br>RESULTS AND DISCUSSION.....               | 55 |
| I- Cultivar Identification.....               | 55 |
| a- Seed protein electrophoresis.....          | 55 |
| b- Isozyme electrophoresis.....               | 59 |
| - Esterase isozyme.....                       | 59 |
| - Peroxidase isozyme.....                     | 61 |
| - GOT isozyme.....                            | 63 |
| - LAP isozyme.....                            | 65 |
| - IPO isozyme.....                            | 67 |
| II- Effect of salinity.....                   | 70 |
| a- Screen house experiment.....               | 70 |
| - Days of germination.....                    | 70 |
| - Days of flowering.....                      | 74 |
| - Number of branches/plant.....               | 74 |
| - Plant height.....                           | 79 |
| - 100-seeds weight.....                       | 79 |
| b- Leaf protein electrophoresis patterns..... | 86 |
| c- Leaf isozymes profile.....                 | 92 |
| - Esterase isozyme.....                       | 92 |
| - Peroxidase isozyme.....                     | 96 |

|                                         |     |
|-----------------------------------------|-----|
| - LAP isozyme.....                      | 100 |
| - GOT isozyme.....                      | 102 |
| d- RAPD Markers.....                    | 106 |
| a- Callus induction and initiation..... | 109 |
| b- Proline content.....                 | 120 |
| SUMMARY AND CONCLUSION.....             | 124 |
| REFERENCES.....                         | 128 |
| ARABIC SUMMARY.....                     |     |
