AIM OF THE PRESENT WORK	
SUMMARY -----	i
INTRODUCTION -----	1
Chemistry of β-aroylacrylic acids -----	1
A) <i>Synthesis of β-aroylacrylic acids -----</i>	1
B) <i>Reactions of β-aroylacrylic acids -----</i>	4
Chemistry of pyridazin-3(2H)-ones -----	14
A) <i>Synthesis of pyridazin-3(2H)-ones -----</i>	14
B) <i>Chemical reactions of pyridazin-3(2H)-ones -----</i>	21
Chemistry of 2(3H)-furanones -----	30
A) <i>Synthesis of 2(3H)-furanones -----</i>	30
B) <i>Reactions of 2(3H)-furanones -----</i>	31
<i>Pharmacological activities of pyridazinone derivatives -----</i>	38
<i>Pharmacological activities of furanones derivatives -----</i>	43
DISCUSSION -----	46
PART (I) -----	47
Reactions of 1,1'-dioxadibenzothien-4-oylacrylic acid	47
A) <i>Michael condensation reaction of β-aroylacrylic acid (I) with active methylene compounds in presence of sodium methoxide</i>	47
B) <i>Michael condensation reaction of β-aroylacrylic acid (I) with active methylene compounds in presence of ammonium acetate</i>	57
PART (II) -----	63
Synthesis and reactions of 4-benzylamino-6-(1',1'-dioxadi- benzothien-4'-yl)-2,3,4,5-tetrahydropyridazin-3-one -----	63
A) <i>Synthesis of 4-benzylamino-6-(1',1'-dioxadibenzothien-4'-yl)-</i>	

2,3,4,5- tetrahydropyridazin-3-one -----	63
B) Reactions of 4-benzylamino-6-(1',1'-dioxadibenzothien-4'-yl)-2,3,4,5-tetrahydropyridazin-3-one -----	67
1) Reaction with ethylchloroacetate -----	67
2) Reaction with acrylonitrile -----	68
3) Reaction with formaldehyde -----	72
4) Mannich reaction -----	74
5) Reaction with aromatic aldehydes -----	77
6) Reaction with amino acids -----	80
7) Reaction with benzylamine -----	82
Synthesis and reaction of 3-chloro-4-benzylamino-6-(1',1'-dioxadibenzothien-4'-yl)-4,5-dihydropyridazine -----	83
a) Formation of pyridazinethione derivative -----	83
b) Formation of hydrazinopyridazine derivative -----	84
Utilization of hydrazinopyridazine derivative in synthesis of condensed and non-condensed heterocyclic compounds -----	86
a) Formation of pyrazolylpyridazine derivatives -----	86
b) Formation of triazolopyridazine derivatives -----	88
c) Formation of tetrazolopyridazine -----	91
PART (III) -----	94
Synthesis and reactions of 3-benzylamino-5-(1',1'-dioxadibenzothien-4'-yl) furan-2-one -----	94
Reactions of 3-benzylamino-5-(1',1'-dioxadibenzothien-4'-yl)-furan-3-one-----	97
1) Hydrazinolysis -----	97
2) Reaction with hydroxylamine hydrochloride -----	100
3) Reaction with semicarbazide and/or thiosemicarbazide-----	101
4) Reaction with glycine -----	104

Contents-----

5) Reaction with antheranilic acid -----	108
6) Aminolysis -----	111

Uses of chloropyrroline derivative in synthesis of condensed

<i>hetrocyclic compounds</i> -----	115
------------------------------------	-----

a) Formation of pyrrolotriazole -----	116
---------------------------------------	-----

b) Formation of pyrrolotetrazole -----	116
--	-----

c) Formation of pyrrolotriazine -----	118
---------------------------------------	-----

7) Acid-catalyzed ring opening reaction of furanone with aluminum chloride in presence of reactive aromatic substrates -----	119
---	-----

<i>Biological activities of the synthesised compounds</i> -----	123
---	-----
