ACKNOWLEDGEMENT	i
List of abbreviations	iii
List of Figures	iv
List of Tables	vii
INTRODUCTION	1
A- Natural ion exchangers	6
1- clay minerals	6
2- Zeolites	6
B- Synthetic inorganic ion exchangers	6
1- Hydrous oxides	7
1.1- Hydrous oxides of divalent and trivalent metals	8
1.2- Hydrous oxides of quadrivalent elements	9
1.3- Hydrous oxides of Pentavalent metals	10
2- Acid salts of Polyvalent metals	13
3- Salts of heteropoly acids	14
4- Insoluble ferrocyanides	14
5- Synthetic aluminum silicate	14
6- Miscellaneous ion exchangers	15
7- literature survey	28
Aim of work	28
Part I	30
Experimental	30
1- general	30
1.1- Chemicals	30
2- Radioactive materials	30
2.1- Cobalt-60	30
2.2- Preparation of Eu-152+154	32
2.3- Preparation of uranium solution	34
3- Radioactive assay	34
4- preparation of Tin(IV) antimonate (SnSb)	35
5- Analysis measurements	35
6- Equilibrium and capacity measurements	36
7- Kinetics of exchange	37
8- Sorption isotherm	38
Results and Discussion	38
1- XRD analysis	38
2- Water content	40
3- Thermal analysis	40
4- Infrared spectra	43
5- Cobalt	43

	Pages
6- Uranium	59
7- Europium	70
Part II	81
Experimental	81
1- Materials and methods	81
2- Preparation of Al-13 Keggin ion	82
✓ 3- Preparation of Al-pillared montmorillonite	82
4- Kinetic study of the acidity affect	83
5- Acid -base stability	83
6- pH titration curve	84
Results and discussion	86
1- Surface area	86
2- Preparation of Al-keggin ion	86
✓ 3- Pillared montmorillonite clay	91
3.1- XRD	92
3.2- TGA	91
3.3- Chemical analysis	97
3.4- The acid base stability	97
4- Titration curve	98
5- Summary	104
6- Appendix	108
7- References	114
8- Arabic summary	127
