

CONTENTS

INTRODUCTION	1
CHAPTER 0:DEFINITIONS TERMINOLOGY AND BASIC RESULTS	5
§ 0.1 Modules	5
§ 0.2 Simple Rings, Central Simple Algebras, Primitive Rings, Prime Ring and Semi Prime Rings.	6
§ 0.3 Chain Conditions	8
§ 0.4 Asano order, Hereditary Rings and Dedekind Domains.	8
§ 0.5 (PLID) Rings (Principal left ideal domain) Polynomial Identities and Tensor Products.	11
§ 0.6 Polycyclic-by-finite groups	12
§ 0.7 Finite Fields, Absolute Fields and More about Modules.	14
CHAPTER I: CROSSED PRODUCTS	15
§ 1.1. The algebraic structure of crossed products	15
§ 1.2 Central Simple Algebras and their Brauer group.	19
CHAPTER II:ALGEBRAS OF TYPE E	24
§ 2.1 On groups containing an infinite cyclic subgroups of finite index and supersolvable group.	24
§ 2.2. The construction of algebras of type E.	26
CHAPTER III ON THE CROSSED PRODUCT OF THE INFINITE GROUP OVER FINITE FIELDS	30
