	Page
PREFACE AND AIM OF THE WORK.....	1
INTRODUCTION	5
PART I	
MATERIALS AND METHODS	17
A- Environmental Conditions	17
I- Climatic factors.....	17
II- Edaphic factors	17
- Soil analysis	17
- Physical analysis	17
a- Soil texture	17
b- Water holding capacity	18
- Chemical analysis	18
a- Soil reaction	18
b- Total soluble salts	18
c- Chlorides	19
d- Sulphates	19
e- Carbonates and bicarbonates	19
f- Calcium carbonate	19
g- Organic carbon	19
h- Cations	20
B- Plant analysis	20
1- Plant moisture content	21
2- Degree of succulence	21
3- Total ash	21
4- Elemental analysis of ash	22
C- Primary metabolic products.....	22
1- Carbohydrate contents	22
a- Estimation of total carbohydrates	22

CONTENTS (Cont.)

	Page
b- Extraction of soluble sugars	23
c- Estimation of total reducing value	23
d- Estimation of direct reducing value	24
e- Extraction of polysaccharides	24
f- Estimation of polysaccharides	24
g- Chromatographic investigation of carbohydrates	25
i- Free sugars	25
ii- Combined sugars	26
2- Nitrogen content	27
a- Total nitrogen	27
b- Soluble nitrogen	27
c- Free amino acids	28
- Analysis of free amino acids using amino acids analyzer	28
d- Protein amino acids	28
1- Extraction of protein	28
2- Hydrolysis of protein	29
3- Analysis of the protein hydrolysate ...	29
3- Lipid content	29
a- Extraction of lipids	29
b- Chemical properties	30
i- Acid value	30
ii- Saponification value	30
iii- Iodine value	31
c- Preparation of fatty acids	31
d- Identification of fatty acids	32
i- Preparation of fatty acids methyl esters	32

CONTENTS (Cont.)

	Page
ii- Gas liquid chromatography (G.L.C.) of the fatty acids methyl esters ...	33
4- Keto-acids	34
a- Extraction	34
b- Estimation	34

RESULTS AND DISCUSSIONS

PART II

LOCATION, GEOLOGY, GEOMORPHOLOGY AND DRAINAGE

- Location	36
- Geology, Geomorphology and Drainage	36
- Climatic conditions	38
- Types of habitats	44
- Root system	44
- Soil analysis	48
1- Granulometric analysis	48
2- Water holding capacity	48
3- Calcium carbonate	48
4- Organic matter content	50
5- Total soluble salt content	50
6- Chloride content	50
7- Soluble carbonate content	50
8- Cations content	50
9- Soil reaction (pH)	52
- Anatomical features of <i>Kanahia laniflora</i>	53
1- Root anatomy	53
2- Stem anatomy	53
3- Leaf anatomy	57

CONTENTS (Cont.)

	Page
- Plant analysis	57
1- Plant moisture content	57
2- Degree of succulence	61
3- Total ash content	64
4- Elemental composition of the ash	67

PART III .

ECOPHYSIOLOGICAL STUDIES

- Primary metabolic products	70
1- Carbohydrate contents	70
a- Total carbohydrates	70
b- Sugar contents	72
i- Direct reducing value (D.R.V).....	72
ii- Total reducing value (T.R.V.).....	74
c- Polysaccharides	74
d- Chromatographic investigation of free and combined sugars	77
i- Free sugars	77
ii- Combined sugars	80
2- Nitrogen contents	80
a- Total nitrogen content	81
b- Total soluble nitrogen	84
c- Insoluble nitrogen	84
d- Investigation of amino acids	85
i- Free amino acids	85
ii- Protein amino acids	96
3- Lipid contents	107
a- Total lipid content	107
b- Properties of the lipid	109
i- Physical properties	109
ii- Chemical properties	110

CONTENTS (Cont.)

	Page
c- Investigation of fatty acids	111
4- Keto-acids	118
 - SECONDARY METABOLIC PRODUCTS	 121
A- Preliminary phytochemical screening	121
- Preparation of the extract	121
1- Test for tannins	121
2- Test for sterols	121
3- Test for terpens	122
4- Test for flavonoids	122
5- Test for alkaloids	123
6- Test for glycosides	123
7- Test for saponins	124
8- Test for resins	124
9- Test for chlorides and sulphates	125
B- Investigation and Identification of Tannins	
Separated from <i>Kanahia laniflora</i>	126
1- Preparation of tannins	126
2- Paper chromatographic investigation of tannins	 126
3- Purification of tannins	127
4- Hydrolysis of tannins	127
5- chromatographic investigation of eluents ...	129
6- Properties of the separated gallic acid	130
7- Quantitative estimation of gallotannins.....	134
C- Investigation and Identification of Saponins	
separated from <i>Kanahia laniflora</i>	136
1- Extraction of saponins	136
2- Chromatographic investigation of the separated saponins	 137

CONTENTS (Cont.)

	Page
i- Paper chromatographic investigation ..	137
ii- Thin layer chromatographic investigation.	137
iii- Column chromatographic separation of saponins	139
3- Hydrolysis of the isolated saponins	139
4- Identification of the glycone fraction	140
5- Identification of the aglycone fraction	140
6- Properties of the aglycone (sapogenin)	142
D- Investigation and Identification of Glycosides.	146
- Extraction of glycosides	146
1- Separation of compound (A)	147
- Properties of the separated compound (A)	147
2- Separation of compound (B)	151
- Properties of the separated compound (B).	151
3- Separation of compound (C)	155
- Properties of the separated compound (C).	155
 PART IV	
GENERAL DISCUSSION	160
 SUMMARY	179
 REFERENCES	185
 ARABIC SUMMARY.
