Introduction.....	Page 1
General outline.....	1
Previous work.....	3
Scope of the present work.....	3
Field work.....	4

CHAPTER I

Methodology

General outline.....	5
I.1-Methods of chemical water analysis.....	6
I.1.1-Total dissolved solids.....	6
I.1.2-Specific electrical conductance (EC).....	6
I.1.3-Hydrogen ion concentration (pH).....	7
I.1.4-Carbonate and bicarbonate.....	7
I.1.5-Chloride.....	8
I.1.6-Calcium and magnesium.....	8
I.1.6.A-Total hardness.....	9
I.1.6.B-Calcium hardness.....	9
I.1.7-Sodium and potassium.....	10
I.1.7.A-Sodium.....	10
I.1.7.B-Potassium.....	11
I.1.8-Sulphate.....	12
I.1.9-Silica.....	13
I.1.10-Boron.....	14
I.1.11-Phosphorous.....	15
I.1.12-Nitrate.....	16
I.2-Experimental work for radioactive and stable isotopes.....	17
I.2.1-Sampling.....	17
I.2.1.1-Sampling for tritium and stable isotopes.....	17
I.2.1.2-Sampling for carbon-14.....	17
I.2.2-Analysis for stable isotopes deuterium and oxygen-18.....	17
I.2.3-Analysis for radioactive isotopes.....	19
I.2.3.1-Analysis for tritium.....	19
I.2.3.2-Analysis for carbon-14.....	20

CHAPTER II		Page
Geomorphological, geological and hydrogeological aspects		
II.1-Geomorphology.....		22
II.2-Geology.....		26
II.2.1-Quaternary deposits.....		26
II.2.2-Miocene deposits.....		26
II.3-Hydrogeology.....		30
II.4-Hydrogeological cross sections.....		32

CHAPTER III		
Hydrochemical aspects		
General outline.....		39
III.1-Chemistry of surface water and Pleistocene groundwater.....		41
III.2-Hydrochemistry of the Miocene groundwater.....		42
III.2.1-Total salinity.....		42
III.2.2-Alkalinity.....		43
III.2.3-Hardness.....		45
III.2.4-Major ion distribution.....		48
III.2.4.1-Distribution of calcium.....		48
III.2.4.2-Distribution of magnesium.....		49
III.2.4.3-Distribution of sodium and potassium.....		53
III.2.4.4-Distribution of carbonate and bicarbonate.....		54
III.2.4.5-Distribution of sulphate.....		56
III.2.4.6-Distribution of chloride.....		58
III.2.4.7-Distribution of silica.....		60
III.3-Distribution of some minor and trace constituents in the groundwater.....		62
III.3.1-Distribution of nitrate (NO_3^-).....		63
III.3.2-Distribution of phosphate (PO_4^{3-}).....		65
III.3.3-Distribution of boron (B^{3+}).....		66
III.3.4-Distribution of iron (Fe^{2+}).....		67
III.4-Major ions relations.....		68
III.4.1-Ion dominance and water type.....		68
III.4.2-Hydrochemical coefficients.....		69
III.4.3-Hypothetical salt assemblages.....		71
III.5-Horizontal changes in groundwater chemistry.....		72
III.6-Geochemical classification of groundwater.....		74
III.6.1-The semi-logarithmic graph (Shoeller, 1962).....		77
III.6.2-Piper's classification.....		81

III.7-Evaluation of Miocene water quality for different purposes.....	88
III.7.1-Evaluation for domestic uses.....	88
III.7.2-Evaluation for consumption of livestock.....	88
III.7.3-Evaluation for agriculture uses.....	91
III.7.4-Evaluation for industrial uses.....	93

CHAPTER IV

Environmental isotopes

	Page
General outline.....	95
IV.1-Radioactive environmental isotopes	97
IV.1.1-Tritium.....	97
IV.1.1.1-Properties of tritium.....	97
IV.1.1.2-Production of tritium.....	98
IV.1.1.3-Tritium in the hydrological cycle.....	99
IV.1.2-Carbon-14.....	100
IV.1.2.1-Properties and production.....	100
IV.2-Dating of groundwater.....	100
IV.3-Stable environmental isotopes.....	102
IV.4-Discussion.....	104
Summary and conclusion.....	123
References.....	131
