Title of Chapter	Number of Page
<b>Chapter 1</b>	<b>1</b>
<b>Introduction and historical notes</b>	
<b>1.1 Limitation of the classical theory of Navier and stokes</b>	<b>1</b>
<b>1.1.1.shear dependent viscosities</b>	<b>2</b>
<b>1.1.2.Normal stress effects</b>	<b>4</b>
<b>1.2 Historical Notes</b>	<b>7</b>
<b>1.2.1 linear and quasi-linear theory of viscoelasticity.</b>	<b>7</b>
<b>1.2.2 Some old nonlinear constitutive equations</b>	<b>9</b>
<b>CHAPTER 2</b>	<b>12</b>
<b>Theory of incompressible simple fluids</b>	
<b>2.1 kinematics of flow:</b>	<b>12</b>
<b>2.1.1 Body and space manifolds:</b>	<b>12</b>
<b>2.1.2 Description of the motion</b>	<b>14</b>
<b>2.1.3 Stretch and rotation</b>	<b>18</b>
<b>2.1.4 The rate of deformation , spin, and kinematics tensors</b>	<b>20</b>
<b>2-1-5 Rivlin – Erickson tensors</b>	<b>21</b>
<b>2.2 The dynamics of motion</b>	<b>22</b>
<b>2.3 Constitutive equation</b>	<b>23</b>
<b>2.3.1 principles of determinism and local action principle of determinism for stresses</b>	<b>24</b>
<b>2.3.2 the principle of material frame-indifference</b>	<b>25</b>
<b>2.3.3 Homogeneity:</b>	<b>27</b>
<b>2.3.4 The constitutive equation for simple materials</b>	<b>27</b>
<b>2.3.5 The constitutive equation of a simple fluid</b>	<b>30</b>
<b>2.3.6.The viscometric functionals:</b>	<b>31</b>
<b>2.3.7.The special case of uniform simple shearing</b>	<b>35</b>
	<b>36</b>

## **CHAPTER 3**

### **Approximate Constitutive Equations**

3.1. Integral expansion of the constitutive for simple fluids	36
3.2. Integral representation of lower order approximations	38
3.3. Asymptotic form for 'slow flow' or retarded motion	41
3.4. A pragmatic approach to constitutive equations	44
3.4.1 Single integral models	44
3.4.2 Differential models of the Oldroyd/Maxwell type	45

## **Chapter 4**

### **Unsteady axial viscoelastic pipe flows of an Oldroyd-B fluid**

4.1 Basic equations	51
4.2 Pressure gradient varying exponentially with time	53
4.2.1 Pressure gradient increasing exponentially with time	53
4.2.1(a) The case of small $\beta$	55
4.2.1(b) The case of large $\beta$	56
4.2.2 Pressure gradient decreasing exponentially with time:	57
4.2.2(a) The case of small $\beta_1$	58
4.2.2.(b) The case of large $\beta_1$	59
4.3 Pulsating pressure gradient	59
4.3(a) For small values of $\beta$	60
4.3(b) For large values of $\beta$	61
4.4 Constant pressure gradient	63
Results and Discussion	67
