Abstract

CHAPTER I INTRODUCTION

1-1 Story of Elementary Particles	1
1-2 The four forces	10
1-2-1 Gravity force	11
1-2.2 electromagnetic force	12
1-2-3 Strong force	12
1-2-3 Weak force	14
1-3 The Quarkonia Problem	16
1-3-1 Formation of the quarkonia.	16
1-3-2 The Quark-Antiquark potential.	18
1-3-3 Lorentz Structure of the interquark potential.	21
1-4 The eigenvalue problem.	22

CHAPTER II The Used Model

2 -1 Structure of Breit Equation.	32
2-2 Non-relativistic reduction of Breit equation.	36
2-2-1 Summary of Foldy-Wouthuysen method.	36
2-2-2 Generalized method.	37
2-3 Reduction of Breit Equation.	41
