INTRODUCTION	1
MATERIALS AND METHODS	18
- Soil Sampling	18
- Mycological Analysis	18
a) The dilution plate method	18
b) Direct inoculation method	20
c) Fungal identification	20
- Soil Analysis	21
a) Soil texture	21
b) Moistre content	22
c) Total soluble salts.....	22
d) Organic carbon	22
e) pH value	23
- Applied Insecticide	23
- Mats Preparation	24
- Biochemical Analysis.....	25
A. Method of mats extraction	25
1. For Nitrogen analysis	25
2. For carbohydrate analysis.....	25
3. For Lipid analysis	26
B. Methods of analysis	26
1. Nitrogen analysis	26
a) Amino -N.....	26
b) Protein-N.	27

	page.
2. Carbohydrate analysis	27
a) Total reducing value (T.R.V.)	27
b) Polysaccharides.....	28
3. Total lipid content	29

EXPERIMENTAL RESULTS

Experiment I

Effect of Different Concentration of Cyolane on Linear Growth and Dry Weight of Mats of Five Soil Fungi Raised in Presence of Two Differ- ent Nitrogen Sources at Various Incubation Tem- peratures	30
---	----

A. Effect of cyolane on the linear growth of five soil fungi under various incubation temperatures.	31
--	----

B. Effect of cyolane on dry weight of mats of five soil fungi under various incubation temperatures.....	48
--	----

Experiment II

Effect of Different Concentrations of Cyolane on the Linear Growth and Dry Weight of Five sSoil Fungi Raised in Presence of Two Different Nitrogen Sources at Various pH-Values	66
---	----

page.

A. Effect of cyolane on the linear growth of five soil fungi under various pH-values...	67
B. Effect of cyolane on dry weight of mats of five soil fungi under various pH-values ..	85

Experiment III

Effect of Different Concentrations of Cyo- lane on Total Protein-N-, Total Soluble Sugars, Polysaccharide and Total Lipid Cont- ents of Five Soil Fungi	102
