I- INTRODUCTION.	1
II- LITERATURE REVIEW.	2
A- Effect of irradiation on the biology of insects.	2
B- Radioresistance in insects.	13
III- MATERIALS AND METHODS.	32
A- Test insects.	32
B- Experimental Methods.	34
1- Biology and fecundity as being affected by chronic irradiation.	34
2- Measurement of Radio sensitivity.	36
3- Male competitiveness experiment.	37
4- Female competitiveness experiment.	39
IV- RESULTS.	42
A- The effect of chronic irradiation on the biology of house fly, <u>M. domestica</u> L. through successive generations.	42
1- Adult emergence and sex ratio.	42
2- Adult longevity.	48
3- Fecundity.	72
4- Fertility.	76
B- Measurements of radiosensitivity of <u>M. domestica</u> L. exposed to substerilizing doses of gamma radiation for five and eleven generations.	78
1- Effect of two additional acute doses of 3000 or 4500 rad on adult emergence, sex ratio adult longevity, fecundity and fertility of F ₆ population.	78
a- Adult emergence and sex ratio.	78
b- Adult longevity.	82
c- Fecundity and fertility.	94

2-	Effect of two additional acute doses of 3000 or 4500 rad on adult emergence, sex ratio, adult longevity, fecundity and fertility of the F_{12} population.	99
a-	Adult emergence and sex ratio.	99
b-	Adult longevity.	101
c-	Fecundity and fertility.	103
C-	The effect of acute dose of gamma radiation on sexual competitiveness of <u>M. domestica</u> L.	106
I-	Mating competitiveness of irradiated males mated with normal females.	106
a-	Mating competitiveness of F_7 males.	106
b-	Mating competitiveness of radio- sterilized F_{13} males.	112
II-	Mating competitiveness of irradiated females mated with normal males.	117
a-	The effect of acute doses of gamma radiation on the mating compe- titiveness of F_7 females.	117
b-	The effect of acute doses of gamma radiation on mating competitiveness of F_{13} females.	122
V-	GENERAL DISCUSSION AND CONCLUSION.	127
VI-	SUMMARY.	134
VII-	REFERENCES.	141
VIII-	ARABIC SUMMARY.
