

CONTENTS

	page
• Aim of the work	I
• Summary	II
• Polymerization process	1
• Synthetic surface active agent	7
• Review of literature.....	10
- Fillers and builders	32
- Biodegradability	35
- Application area of some polymeric surfactants	39
• Materials and methods	46
- Synthesis of polymeric self - sequestering surfactants	49
- Synthesis of water - soluble polyester surfactants.....	50
- Copolymerization reactions	52
- Surface active properties	52

• Discussion :	
I. Synthesis and surface activity of oligomeric self- sequest- ering surfactants	59
II. Preparation and surface activity of water- soluble polyester surfactants	105
III. Copolymers of hydrophobic and hydrophilic monomers based on itaconic acid as nonionic surfactants	150
• Reference	182
• Arabic summary .
