CHAPTER I	
INTRODUCTION	
A - Literature survey on the polarography of hydrazones	1
B - Literature survey on the metal chelates of hydrazo compounds	6
C - Literature survey on the analytical applications of hydrazones	16
AIM OF THE WORK	22
CHAPTER II	
EXPERIMENTAL	
I - Preparation of the solid hydrazones	23
II- Polarographic Investigations	23
III- Preparation of solutions for potentiometric titration	25
IV- Preparation of solutions for spectral measurements	27
V - Preparation of solutions for conductance measurements	27
VI- Studies on the solid chelates	28
CHAPTER III	
RESULTS AND DISCUSSION	
PART (A): STUDIES OF THE FREE LIGANDS	
1 - D-C polarographic investigation	32
(1) The polarographic behaviour of acenaphthenequinone mono- phenylhydrazone derivatives in ethanolic buffer solutions.....	32
(2) Effect of concentration of the ligands	38
2 - Spectrophotometric studies	46
(i) Spectral behaviour of acenaphthenequinone monophenylhydrazone derivatives in buffer solutions and the determination of their acid ionisation constants	46
(ii) Electronic absorption spectra of acenophthenequinone mono- phenylhydrazone derivatives in different organic solvents.....	50
PART (B): STUDIES OF THE METAL CHELATES IN SOLUTIONS	
1 - Conductometric titration	59
2 - Potentiometric titration	62
3 - Polarographic studies of some metal chelates	67
4 - Spectrophotometric studies of metal chelates in solutions.....	69

	Page
PART (C): STUDIES OF THE SOLID COMPLEXES	
(i) Elemental analysis and molar conductivities of metal chelates	81
(ii) Thermogravimetric and differential thermal analysis of some metal chelates	87
(iii) Infrared spectra of the solid metal chelates	93
(iv) Proton magnetic resonance spectra of La^{3+} -chelates	104
(v) Electronic spectra and magnetic properties of metal chelates..	107
I - Electronic absorption spectra of metal chelates	107
II - Magnetic properties of some metal chelates	111
(vi) Structural elucidation of the solid complexes	115
CHAPTER (D)	
1 - Polarographic micro determination of Co^{2+} , Ni^{2+} and Cu^{2+}	119
2 - Micro determination of the metal ions spectrophotometrically..	122
