Chapter 1: INTRODUCTION	
1.1 Introductory Outline.....	1
1.2 Radioisotopes of Gallium, Indium and Thallium.....	2
1.3 Cyclotrons and their Utilization.....	3
1.4 Production of Radionuclides.....	12
1.4.1 Commonly used Production Methods.....	12
1.4.2 Nuclear Data Relevant to Cyclotron Produced Short-Lived Medical Radioisotopes.....	15
1.4.2.1 Nuclear Structure and Decay Data Importance.....	15
1.4.2.2 Nuclear Reaction Data Importance.....	17
1.5 Production of Gallium-67	18
1.5.1 Gallium-67 Production via Zn Target Irradiation	18
1.5.1.1 Target Preparation and Cooling System.....	18
1.5.1.2 Excitation Function of $^{67}\text{Zn}(p, n)^{67}\text{Ga}$ Reaction.....	22
1.5.1.2.1 Thick Target Yield of $^{67}\text{Zn}(p, n)^{67}\text{Ga}$ Reaction.....	22
1.5.1.3 Excitation Function of $^{68}\text{Zn}(p, 2n)^{67}\text{Ga}$ Reaction.....	23
1.5.1.3.1 Thick Target Yield of $^{68}\text{Zn}(p, 2n)^{67}\text{Ga}$ Reaction.....	24
1.5.2 Gallium-67 Production via Cu Target Irradiation.....	25
1.5.2.1 Target Preparation and Irradiation.....	25
1.6 Production of Indium-111	27
1.6.1 Indium-111 Production via Cd-Target Irradiation.....	27
1.6.1.1 Targetary and Irradiation.....	27
1.6.1.1.1 Internal Target Irradiation.....	27
1.6.1.1.2 External Target Irradiation.....	28

1.6.1.1.3 Thin and Thick Target Yield.....	318
1.6.2 Indium-111 Production via Ag-Target Irradiation.....	320
1.6.2.1 Targetary and Irradiation.....	322
1.6.2.1.1 Internal Target Irradiation	324
1.6.2.1.2 External Target irradiation.....	326
1.7 Production of Thallium-201	328
1.7.1 Target Preparation and Irradiation.....	330
1.7.2 Excitation Functions.....	332
1.8 General Chemistry of the Target Elements(Zn, Cd and Ag).....	334
1.9 General Chemistry of the Product Elements(Ga, In and Tl).....	336
1.9.1 Gallium-67.....	338
1.9.2 Indium-111.....	340
1.9.3 Thallium-201.....	342
1.10 Literature Survey.....	344
1.10.1 Radiochemical Separation.....	346
1.10.1.1 Gallium.....	348
1.10.1.2 Indium.....	350
1.10.1.1 Thallium.....	352
 Chapter 2: EXPERIMENTAL	
2.1 Chemicals and Reagents.....	354
2.1.1 Radioactive Tracers.....	356
2.1.2 Preparation of 12-Molybdocerate(IV) Matrix.....	358
2.2 Instrumentation.....	360
2.3 Distribution Behaviour Investigations.....	362
2.3.1 Static Investigations.....	364
2.3.1.1 Effect of H ⁺ -ion Concentration.....	366
2.3.1.2 Effect of acid Anion.....	368
2.3.1.3 Effect of Concentration of the Radiotracer.....	370
2.3.2 Dynamic Investigations	372
2.3.2.1 Effect of Concentration of the Radiotracer.....	374
2.3.2.2 Effect of Nature and Composition of the Feed Solution.....	376

2.4 Chromatographic Separations.....	
2.4.1 Chromatographic Column Elution Method.....	
2.4.1.1 Effect of Nature and Composition of the Eluent.....	
2.4.1.2 Effect of Flow Rate of the Eluent.....	
2.4.2 Chromatographic Column Frontal Method.....	
2.5 Regeneration of the Column Matrix	
2.6 Quality Control Studies.....	
2.6.1 Radionuclidic Purity.....	
2.6.2 Radiochemical purity.....	
2.6.3 Chemical Purity.....	

Chapter 3: RESULTS and DISCUSSION

3.1 Zinc(II) - Gallium(III) Couple.....	
3.1.1 Distribution Behaviour Investigations.....	
3.1.1.1 Static Studies.....	
3.1.1.1.1 Effect of H^+ -ion Concentration.....	
3.1.1.1.2 Effect of the acid Anion.....	
3.1.1.1.3 Effect of Concentration of the Radiotracers.....	
3.1.1.1.4 Interfering Radiocontaminants.....	
3.1.1.2 Dynamic Studies.....	
3.1.1.2.1 Effect of Concentration of the Radiotracers.....	
3.1.1.2.2. Effect of Chemical Composition and Nature of the Feed Solutions.....	
3.1.2 Chromatographic Column Separation.....	
3.1.2.1 Elution Chromatography.....	
3.1.2.1.1 Effect of Nature and Concentration of the Eluent	
3.1.2.1.2 Effect of Flow Rate of the Eluent.....	
3.1.2.1.3 Recommended Procedure for Elution Separation of the Zinc(II)-Gallium(III) Couple.....	
3.1.2.2 Frontal Chromatography.....	
3.1.2.2.1 Recommended Procedure for Frontal Separation of the Zinc(II)-Gallium(III) Couple.....	

3.1.3 Regeneration of the Column Matrix.....	
3.1.4 Quality Control Tests.....	
3.1.4.1 Chemical Purity of the Gallium(III) Eluates.....	
3.1.4.2 Radionuclidic Purity of the Gallium(III) Eluates.....	
3.1.4.3 Radiochemical Purity of the Gallium(III) Eluates.....	
3.2 Cadmium(II) - Indium(III) Couple.....	
3.2.1 Distribution Behaviour Investigations.....	
3.2.1.1 Static Studies.....	
3.2.1.1.1 Effect of H^+ -ion Concentration.....	
3.2.1.1.2 Effect of the acid Anion.....	
3.2.1.1.3 Effect of Concentration of the Radiotracers.....	
3.2.1.2 Dynamic Studies.....	
3.2.1.2.1 Effect of Concentration of the Radiotracers.....	
3.2.1.2.2. Effect of Chemical Composition and Nature of the Feed Solutions.....	
3.2.2 Chromatographic Column Separation.....	
3.2.2.1 Elution Chromatography.....	
3.2.2.1.1 Effect of Nature and Concentration of the Eluent	
3.2.2.1.2 Effect of Flow Rate of the Eluent.....	
3.2.2.1.3 Recommended Procedure for Elution Separation of the Cadmium(II)-Indium(III) Couple.....	
3.2.2.2 Frontal Chromatography.....	
3.2.2.2.1 Recommended Procedure for Frontal Separation of the Cadmium(II)-Indium(III) Couple.....	
3.2.3 Regeneration of the Column Matrix.....	
3.3 Silver(I) - Indium(III) Couple.....	
3.3.1 Distribution Behaviour Investigations.....	
3.3.1.1 Static Studies.....	
3.3.1.1.1 Effect of H^+ -ion Concentration.....	
3.3.1.1.2 Effect of Concentration of the Radiotracers.....	
3.3.1.2 Dynamic Studies.....	
3.3.1.2.1 Effect of Concentration of the Radiotracer.....	

3.3.1.2.2. Effect of Chemical Composition and Nature of the Feed Solutions.....	
3.3.2 Chromatographic Column Separation.....	
3.3.2.1 Elution Chromatography.....	
3.3.2.1.1 Effect of Chemical Composition of the Eluent	
3.3.2.1.2 Effect of Flow Rate of the Eluent.....	
3.3.2.1.3 Recommended Procedure for Elution Separation of the Silver(I)-Indium(III) Couple.....	
3.3.2.2 Frontal Chromatography.....	
3.3.2.2.1 Recommended Procedure for Frontal Separation of the Silver(I)-Indium(III) Couple.....	
3.3.3 Regeneration of the Column Matrix.....	
3.3.4 Quality Control Tests.....	
3.3.4.1 Chemical Purity of the Indium (III) Eluates.....	
3.3.4.2 Radionuclidic Purity of the Indium(III) Eluates.....	
3.3.4.3 Radiochemical Purity of the Indium(III) Eluates.....	
3.4 Lead(II) - Thallium(I) Couple.....	
3.4.1 Distribution Behaviour Investigations.....	
3.4.1.1 Static Studies.....	
3.4.1.1.1 Effect of H^+ -ion Concentration.....	
3.4.1.1.2 Effect of the acid Anion.....	
3.4.1.1.3 Effect of Concentration of the Tracers.....	
3.4.1.2 Dynamic Studies.....	
3.4.1.2.1 Effect of Concentration of the Tracers.....	
3.4.1.2.2. Effect of Chemical Composition and Nature of the Feed Solutions.....	
3.4.2 Chromatographic Column Separation.....	
3.4.2.1 Elution Chromatography.....	
3.4.2.1.1 Effect of Nature and Concentration of the Eluent	
3.4.2.1.2 Effect of Flow Rate of the Eluent.....	
3.4.2.1.3 Recommended Procedure for Elution Separation of the Lead(II)-Thallium(I) Couple.....	

3.4.2.2 Frontal Chromatography.....	1008
3.4.2.2.1 Recommended Procedure for Frontal Separation of the Lead(II)-Thallium(I) Couple.....	1010
3.4.3 Regeneration of the Column Matrix.....	1011
3.4.4 Quality Control Tests.....	1014
3.4.4.1 Chemical Purity of the Thallium (I) Eluates.....	1014
3.4.4.2 Radionuclidic Purity of the Thallium(I) Eluates.....	1016
3.4.4.3 Radiochemical Purity of the Thallium(I) Eluates.....	1016
Summary.....	1018
References.....	1018
