|------------------------------------------------------------------|-------------|
| <b>Chapter (1): INTRODUCTION</b>                                 |             |
| 1.1 HISTORICAL BACK GROUND.....                                  | 1           |
| 1.2 PREPARTION OF MACROCYCLIC COMPLEXES.....                     | 4           |
| 1.3 LITRATURE SURVEY AND SYNTHESIS OF MACROCYCLIC COMPLEXES..... | 8           |
| <b>Chapter (2): EXPERMENTAL</b>                                  |             |
| 2.1 MATERIALS.....                                               | 36          |
| 2.2 PREPARTION OF MACROCYCLIC COMPLEXES.....                     | 36          |
| 2.3 INVESTIGATION OF THE PREPARED MACROCYCLI-CCOMPLEXES.....     | 37          |
| 2.3.1 <i>Determination of metal percentage</i> .....             | 37          |
| 2.3.2 <i>Dehydration</i> .....                                   | 38          |
| 2.3.3 <i>Elemental analysis</i> .....                            | 39          |
| 2.3.4 <i>Molar conductance</i> .....                             | 39          |
| 2.3.5 <i>Fourier transform infrared spectra (FT-IR)</i> .....    | 39          |
| 2.3.6 <i>UV/Visible spectra</i> .....                            | 39          |
| 2.3.7 <i>Magnetic susceptibility measurements</i> .....          | 40          |
| 2.3.8 <i>ESR spectra</i> .....                                   | 40          |
| 2.3.9 <i>Atomic absorption measurements</i> .....                | 40          |
| 2.3.10 <i>DTA-TG analysis</i> .....                              | 41          |
| 2.3.11 <i>X-Ray differaction analysis</i> .....                  | 41          |
| 2.3.12 <i>Scanning electron microscope</i> .....                 | 41          |
| 2.4 KINETIC MEASUREMENTS.....                                    | 42          |
| 2.4.1 Preparation of the stock solution.....                     | 42          |
| 2.4.1.1 <i>Metal ion complex solution</i> .....                  | 42          |
| 2.4.1.2 <i>Preparation of catechol solutions</i> .....           | 42          |
| 2.4.2 Measurements.....                                          | 42          |
| 2.5 ELECTRICAL CONDUCTIVITY MEASUREMENTS.....                    | 43          |

| Subject                                                                                                                                            | Page                   |
|----------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| Chapter (3)                                                                                                                                        | RESULTS AND DISCUSSION |
|                                                                                                                                                    | PART (A)               |
| 3-A STRUCTURE ELUCIDATION OF MACRO CYCLIC COMPLEXES                                                                                                |                        |
| 3.A.1 ELEMENTAL ANALYSIS.....                                                                                                                      | 45                     |
| 3.A.2 MOLAR CONDUCTIVITIES OF METAL COMPLEXES....                                                                                                  | 45                     |
| 3.A.3 THERMOGRAVIMETRIC AND DIFFERENTIAL THERMAL ANALYSIS OF SOME MACRO COMPLEXES...                                                               | 47                     |
| 3.A.4 INFRARED SPECTRA OF MACROCYCLIC COMPLEXES .....                                                                                              | 51                     |
| 3.A.4.i <i>IR spectra of macrocyclic complexes formed between o-phenylenediamine and acetylacetone, benzoylacetone and dibenzoyl methane.....</i>  | 51                     |
| 3.A.4.ii <i>IR spectra of macrocyclic complexes formed between p-phenylenediamine and acetylacetone, benzoylacetone and dibenzoyl methane.....</i> | 53                     |
| 3.A.5 ELECTRONIC SPECTRA AND MAGNETIC PROPERTIES....                                                                                               | 57                     |
| Theory.....                                                                                                                                        | 57                     |
| 3.A.5.4 ELECTRONIC SPECTRA AND MAGNETIC PROPERTIES OF INVESTIGATED SOLID COMPLEXES .....                                                           | 68                     |
| 3.A.5.4.1 <i>Spectral and magnetic properties of Fe(III) complexes.....</i>                                                                        | 68                     |
| 3.A.5.4.2 <i>Spectral and magnetic properties of Co(II) complexes.....</i>                                                                         | 69                     |
| 3.A.5.4.3 <i>Spectral and magnetic properties of Ni(II) complexes.....</i>                                                                         | 70                     |
| 3.A.5.4.4 <i>Spectral and magnetic properties of Cu(II) complexes.....</i>                                                                         | 72                     |
| 3.A.6 ELECTRON SPIN RESONANCE OF COPPER COMPLEXES.....                                                                                             | 75                     |
| 3.A.7 X-RAY DIFFRACTION ANALYSIS.....                                                                                                              | 83                     |
| 3.A.8 SCANNING ELECTROMICROSCOPE.....                                                                                                              | 83                     |

## PART (B)

|                                                                                                                  |    |
|------------------------------------------------------------------------------------------------------------------|----|
| 3.B KINETIC STUDIES ON THE OXIDATION PROCESS OF CATECHOL BY Cu(II), Ni(II), Co(II) and Fe(III) COMPLEXES         |    |
| 3.B.1 CATALYTIC ACTIVITY OF TRANSITION METAL COMPLEXES.....                                                      | 84 |
| 3.B.2 CATALYTIC APPLICATION OF THE MACROCYCLIC COMPLEXES.....                                                    | 88 |
| 3.B.2.1 <i>Catecholase biomimetic activity</i> .....                                                             | 88 |
| 3.B.2.2 <i>Effect of catalyst and catechol concentration</i> .....                                               | 88 |
| 3.B.2.3 <i>Effect of catalyst structure</i> .....                                                                | 91 |
| 3.B.2.4 <i>Effect of time</i> .....                                                                              | 91 |
| 3.B.3 KINETIC STUDIES ON THE OXIDATION PROCESS OF CATECHOL BY Cu(II), Ni(II), Co(II) and Fe (III) COMPLEXES..... | 92 |
| 3.B.3.1 <i>The order of the reaction</i> .....                                                                   | 92 |
| 3.B.4 PROBABLE MECHANISM FOR THE CATALYTIC CONVERSION OF CATECHOL TO O-QUINONE.....                              | 95 |

## PART (C)

|                                                                                                                         |     |
|-------------------------------------------------------------------------------------------------------------------------|-----|
| 3.C ELECTRICAL CONDUCTIVITY OF THE SOLID STATE MACROCYCLIC COMPLEXES                                                    |     |
| 3.C.1 THE FREQUENCY DEPENDANCE OF THE TOTAL CONDUCTIVITY.....                                                           | 98  |
| 3.C.2 THE TEMPERATURE DEPENDANCE OF THE TOTAL CONDUCTIVITY.....                                                         | 102 |
| 3.C.3 FREQUENCY AND TEMPERATURE DEPENDANCE OF THE DIELECTRIC CONSTANT OF MACROCYCLIC COMPLEXES.....                     | 104 |
| 3.C.4 FREQUENCY AND TEMPERATURE DEPENDANCE OF THE DIELECTRIC LOSS OF MACROCYCLIC COMPLEXES.....                         | 106 |
| 3.C.5 FREQUENCY AND TEMPERATURE DEPENDANCE OF THE DIELECTRIC LOSS TANGENT (TAN $\delta$ ) OF MACROCYCLIC COMPLEXES..... | 108 |
| REFERENCES.....                                                                                                         | 110 |
| SUMMARY                                                                                                                 |     |
| ARABIC SUMMARY                                                                                                          |     |
