

CONTENTS

AIM OF THE WORK

	Page
SUMMARY	i
CHAPTER (I)	
INTRODUCTION	
1.1 General Background on Micelles.....	1
1.2 Electrochemistry in Micelles and Microemulsion.....	3
1.3 Literature Survey on Electrochemistry in Micelles	4
1.3.1 Determination of CMC of surfactant	4
1.3.2 Diffusion in Micelles	5
1.3.3 Solubilization of Electroactive Molecules in Micellar Solution...	6
1.4 General Background on Microemulsions.....	8
1.5 Literature Survey on Electrochemistry in Microemulsion	11
1.5.1 Diffusion in conductive microemulsions	11
1.5.2 Diffusion Studies with Microelectrodes.....	13
1.5.3 Partitioning and equilibria in Microemulsions.....	13
1.5.4 Electrochemical reactions in micelles and microemulsions.....	15
1.6 Background on Electrochemical Techniques	17
1.6.1 Cyclic voltammetry (CV).....	17
1.7 Rotating Disk Voltammetry (RDV).....	20
1.8 Chronocoulometry (CC)	23

CHAPTER (II)

EXPERIMENTAL

2.1 Micelle and Microemulsion Formulation.....	27
2.2 Materials used in electrochemical investigation.....	28

2.3 Material Purification.....	29
2.3.1 CTAB Purification.....	29
2.3.2 Ferrocene Purification.....	29
2.4 Electrochemical Experiments.....	29
2.4.1 Instrumentation.....	29
2.4.2 Preparation of samples for electrolysis.....	30

CHAPTER (III)

RESULTS AND DISCUSSION

Part (A)

3 Electrochemical Characterization of AOT and C₁₈DMB

Micelle and Microemulsion Systems.....	36
3.1 Electrochemical Characterization of AOT Micelles	37
3.1.1 Voltammetric Detection of Micelles.....	37
(i) Cyclic voltammetry (CV)	37
(ii) Rotating disk voltammetry (RDV).....	38
3.1.2 Solubility of Ferrocene in AOT Micelles.....	41
3.1.3 Effect of salt concentration	43
3.2 Electrochemical Characterization of AOT Microemulsion	
System	52
3.2.1 Effect of probe concentration.....	53
3.2.2 Effect of hydrocarbon.....	54
3.2.3 Effect of salt concentration.....	54
3.2.4 Effect of surfactant concentration.....	55
3.2.5 Rotating disk voltammetry (RDV).....	55
3.2.6 Chronocoulometry(CC).....	57
3.3 Partitioning of Ferrocene.....	58
3.4 Electrochemical Characterization of C₁₈DMB Surfactant	71
3.4.1 Voltammetric Detection of Micelles	71

(i) Cyclic voltammetry (CV).....	71
(ii) Rotating disk voltammetry (RDV)	72
3.4.2 Solubilization Studies of Ferrocene in C ₁₈ DMB Micelles.....	74
3.4.3 Effect of salt on C ₁₈ DMB micelle	76
3.5 Electrochemical Characterization of C₁₈DMB Microemulsion..	84
3.5.1 Effect of oil content.....	85
3.5.2 Effect of salt concentration.....	86
3.5.3 Effect of surfactant concentration.....	86
3.5.4 Rotating disk voltammetry (RDV).....	87
3.5.4.1 Effect of hydrocarbon and salt concentration.....	88
3.5.5 Chronocoulometry (CC)	89

Part (B)

3.6 Electrachemical Investigations in Micelles and	
Microemulsion Media.....	101
3.6.1 1,4-Naphthoquinone (I).....	103
(i) Cyclic voltammetry	103
(ii) Rotating disk voltammetry (RDV).....	106
(iii) Chronocoulometry (CC).....	107
3.6.2 2-methyl-1,4- naphthoquinone (II)	115
(i) Cyclic voltammetry	115
(ii) Rotating disk voltammetry (RDV).....	117
(iii) Chronocoulometry (CC).....	118
3.6.3 2-hydroxy-1,4-naphthoquinone (III).....	126
(i) Cyclic voltammetry	126
(ii) Rotating disk voltammetry (RDV).....	128
(iii) Chronocoulometry (CC).....	129
3.6.4 1,2-Naphthoquinone-4-sodium sulfonate (IV).....	137
(i) Cyclic voltammetry	137
(ii) Rotating disk voltammetry (RDV).....	139

(iii) Chronocoulometry (CC).....140

3.6.5 The electrode reaction mechanisms.....149
