List of Tables -----	VI
List of Figures -----	VIII

CHAPTER-1 INTRODUCTION

1.1.	Radioactivity-----	1
1.1.1.	Types of Radioactivity -----	2
1.1.2.	Units of Radiation Measurement-----	3
1.1.3.	Sources of the Environmental Radioactivity -----	3
1.1.3.1.	Man-made sources -----	3
1.1.3.2.	Natural Sources-----	4
1.2.	Radiological Aspects -----	11
1.2.1.	Radiation Hazards-----	11
1.2.2.	Detection of Radiation -----	12
1.2.3.	Limits of Radiation Contamination and Exposure -----	13
1.2.3.1.	Equipment-----	13
1.2.3.2.	Radioactive materials-----	13
1.2.3.3.	Human exposure -----	14
1.3.	TE-NORM Wastes Produced from Phosphate Processing -----	15
1.3.1.	Utilization of Phosphogypsum -----	17
1.3.2.	Environmental Concerns Related to Storage and Uses of Phosphogypsum Wastes -----	18
1.3.2.1.	Atmospheric fluoride -----	18
1.3.2.2.	Groundwater pollution -----	20
1.3.2.3.	Radon gas and other radioactive exposure -----	21
1.3.2.4.	Radionuclide uptake by plants and radioactive buildup in soil -----	23
1.3.2.5.	Non-radioactive element uptake by plants-----	24
1.3.2.6.	Other concerns-----	24
1.4.	TE-NORM in Gas and Petroleum Industry-----	24
1.4.1.	TE-NORM Formation -----	26
1.4.2.	Literature on the Management of TE-NORM Wastes -----	27
1.4.2.1.	Inhibition approaches-----	27
1.4.2.2.	Trials for treatment of TE-NORM -----	29
1.4.2.2.1.	Volume reduction -----	29
1.4.2.2.2.	Use of reagents -----	29

1.4.2.2.3. Recycling equipment-----	30
1.4.2.3. Subsurface injection approaches -----	31
1.4.2.3.1. Solid TE-NORM waste-----	31
1.4.2.3.2. Liquid TE-NORM waste-----	31
1.5. Assessment of Radioactivity from TE-NORM-----	32
1.6. Radiochemistry of Interested Radionuclides -----	35
1.6.1. Radium -----	35
1.6.2. Radon -----	38
1.7. Literature Survey on the Treatment of TE-NORM Wastes -----	40
1.7.1 Treatment of Phosphogypsum Wastes -----	40
1.7.2 Treatment Sediments of Petroleum Wastes-----	42
1.8 Aim of the present work-----	42

CHAPTER-2 EXPERIMENTAL

2.1. Chemicals and Reagents -----	44
2.2. Collection of Samples -----	44
2.3. Preparation of Samples-----	44
2.4. Characterization of the Phosphogypsum (PG) Wastes-----	44
2.4.1. Determination of Moisture Content (%) -----	44
2.4.2. Determination of Total Organic Matter-----	46
2.4.3. Fractionation of Samples-----	46
2.4.4. Spectroscopic Characterization -----	46
2.4.4.1. X -ray diffraction (XRD)-----	46
2.4.4.2. X -ray fluorescence (XRF)-----	46
2.4.4.3. IR –spectra -----	46
2.5. Nuclear Spectroscopic Measurements -----	47
2.5.1. Nondestructive Gamma Ray Spectrometry-----	47
2.5.1.1. Instrumentation-----	47
2.5.1.2. Energy calibration-----	49
2.5.1.3. Efficiency calibration -----	49
2.5.1.4. Efficiency calculations -----	54
2.5.1.5. Efficiency examination of the HPGe-detector -----	57
2.5.1.6. Preparation of samples for γ -spectrometry measurements-----	57
2.5.1.7. Determination of radon emanation fraction -----	58
2.5.2. Alpha Spectrometry Measurements -----	59
2.5.2.1. Sample preparation -----	59

2.5.2.2.	Dissolution of samples -----	59
2.5.2.3.	Extraction and back-extraction of uranium-----	60
2.5.2.4.	Reduction and precipitation of uranium -----	60
2.5.2.5.	Chromatographic separation of uranium-----	61
2.5.2.6.	Source preparation of uranium for alpha spectrometry -----	61
2.5.2.7.	Alpha spectrometry setup-----	63
2.5.2.8.	Calculations of alpha measurements -----	63
2.6.	Physico-Chemical Measurements of Waste Effluent-----	64
2.6.1.	Acidity and Conductivity -----	64
2.6.2.	Determination of the Total Dissolved Solid (TDS) -----	65
2.6.3.	Determination of Calcium and Magnesium Hardness -----	65
2.6.4.	Determination of Anions-----	66
2.6.4.1.	Gravimetric determination of sulphate and chloride -----	66
2.6.4.1.1	Determination of sulphate -----	66
2.6.4.1.2.	Determination of chloride-----	66
2.6.4.2.	Ion chromatography for determination of anions-----	67
2.6.5	Spectrophotometric Determination of Total Uranium in Waste Effluent-----	68
2.7.	Leaching Studies -----	70

CHAPTER-3

RESULTS AND DISCUSSION

3.1.	Characterization Studies -----	72
3.1.1.	Radiological Characterization-----	72
3.1.1.1.	Phosphate rocks -----	72
3.1.1.2.	Phosphoric acid-----	77
3.1.1.3.	Phosphogypsum (PG) -----	80
3.1.1.4.	Waste effluent -----	87
3.1.2.	General Characterization of PG -----	92
3.1.2.1.	Physical characterization-----	92
3.1.2.1.1.	Moisture content -----	92
3.1.2.1.2.	Total organic matter (TOM)-----	92
3.1.2.1.3.	Fractionation process -----	92
3.1.2.2.	Spectroscopic characterization -----	94
3.1.2.2.1.	X –ray diffraction -----	94
3.1.2.2.2.	X –ray fluorescence-----	94

3.1.2.2.3. IR spectrometry -----	98
3.1.2.3. Radiation hazard indices -----	98
3.1.2.3.1. Radon emanation fraction-----	98
3.1.2.3.2. Radium equivalent activity (Ra-eq) -----	100
3.1.2.3.3. Total absorbed dose rate (D_{yr})-----	103
3.2. Treatment of the PG Waste -----	105
3.2.1. Optimization of Leaching Process -----	105
3.2.1.1. Effect of leachant volume-----	105
3.2.1.2. Effect of contact time-----	107
3.2.1.3. Effect of hydrogen ion concentration (pH)-----	107
3.2.1.4. Effect of temperature -----	107
3.2.2. Leaching Using Different Acids Solutions -----	109
3.2.2.1. Mineral acids solutions-----	112
3.2.2.2. Organic acids solutions-----	112
3.2.3. Leaching Using Solutions of some Chloride Salts -----	115
3.2.3.1. Mixed solutions of chloride salts with hydrochloric acid -----	117
3.2.4. Leaching Using Solutions of Some Nitrate Salts -----	119
3.2.4.1. Mixed solutions of nitrate salts with nitric acid -----	121
3.2.5. Leaching Using Solutions of Some Organic Salts-----	121
3.2.5.1. Solutions of acetate salts -----	121
3.2.5.1.1. Mixed solutions of acetate salts with acetic acid -----	124
3.2.5.2. Solutions of oxalate salts-----	124
3.2.5.2.1. Mixed solutions of some oxalate salts with oxalic acid -----	127
3.2.5.3. Sodium citrate solutions-----	127
3.2.5.3.1. Mixed solutions of sodium citrate with citric acid -----	127
3.2.6. Improvement of the leachability process -----	131
3.2.6.1. Successive leaching using solution of nitric acid-----	131
3.2.6.2. Pre-treatment before using nitric acid as a leachant solution -----	131
3.2.6.3. Optimization of the pre-treatment process-----	133
3.2.6.3.1. Effect of contact time-----	134
3.2.6.3.2. Effect of temperature -----	134
3.2.6.3.3. Effect of sodium carbonate concentration -----	136
3.2.7. Conclusion of Treatment-----	136

GENERAL CONCLUSION	140
