SUMMARY	i
GENERAL PART	
SYNTHESIS AND CHEMICAL REACTIONS OF 5(4)-OXAZOLONES ..	1
Introduction	
Synthesis:	
1) From α -acylamino acids	2
2) From α -acylamino esters and amides	5
3) From α -acylamino acid halides	6
4) From alkoxy-carbonylamino acids	7
5) Via Erlenmeyer synthesis	8
6) Via dehydration of β -hydroxy- α -acylamino acids..	18
7) Via the Bergmann synthesis	19
8) Via dehydration of β -alkoxy or β -acyloxy- α -acyl- amino acids	19
9) Miscellaneous synthesis	21
Physical properties	26
Chemical properties	26
1) Hydrolysis	26
2) Alcoholysis	32
3) Thiolytic	37
4) Aminolysis	39
5) Perkin reaction with Schiff bases	46
6) Hydrazinolysis	47
7) Reactions with acids and acid chlorides	51
8) Action of amino-acids and their esters	53
9) With hydroxylamine hydrochloride	57
10) Azidolysis	58
11) Oxidation	60
12) Reduction	62
13) Rearrangements	65

	Page
14) Thermolysis	67
15) Optical activity and tautomerism	69
16) Action of Grignard reagents	71
17) Photolysis	77
18) Friedel-Craft's reaction	78
19) Reaction with alkyl halides	82
20) Geometrical isomerism	84

ORIGINAL WORK

PART - I

SYNTHESIS AND HETERO RING OPENING ALKYLATION OF AROMATIC HYDROCARBONS WITH 2-[β -(3,4-DICHLOROBENZOYL)VINYL]-5(4)- OXAZOLONES	86
--	----

PART - II-A

SYNTHESIS AND REACTIONS OF SOME 2-ARYL-4-ARYLIDENE-5(4)- OXAZOLONES	96
I) SYNTHESIS OF 4-ARYLIDENE-2-ARYL-5(4)-OXAZOLONES	96
II) REACTIONS OF 4-ARYLIDENE-2-ARYL-5(4)-OXAZOLONES	99
A) Aminolysis	99
B) Hydrazinolysis	105
C) Base-catalyzed ring opening with hydroxylamine hydrochloride	109
D) Azidolysis	114

PART - II-B

SYNTHESIS AND REACTIONS OF 4-(3-NITROPHTHALIDENE)-2- (<u>p</u> -CHLOROPHENYL)-5(4)-OXAZOLONE	117
1) SYNTHESIS OF 4-(3-NITROPHTHALIDENE)-2-(<u>p</u> -CHLORO- PHENYL)-5(4)-OXAZOLONE	118
2) REACTIONS OF 4-(3-NITROPHTHALIDENE)-2-(<u>p</u> -CHLORO- PHENYL)-5(4)-OXAZOLONE	119
A) Hydrazinolysis	119
(i) With hydrazine hydrate	119
(ii) With phenylhydrazine	122
B) Aminolysis	124
EXPERIMENTAL	128
