Summary		v-ix
Chapter 1		1
1. Introduction		1
1.1	Background and Technical Target of Reactive Dyes	1
1.2	Bifunctional Reactive Dyes	4
1.2.1	<i>Homo-bifunctional reactive dyes</i>	7
1.2.1.1	<i>bis-Monochlorotriazine reactive dyes</i>	8
1.2.1.2	<i>bis -Monofluorotriazine (MFT) reactive dyes (Cibacron LS "Low-Salt dyes")</i>	10
1.2.1.3	<i>bis –Sulphatoethylsulphone (SES) reactive dyes</i>	11
1.2.2	Hetero-bifunctional reactive dyes	16
1.2.2.1	<i>Monochlorotriazine/Vinylsulphone (MCT/VS) reactive dyes (Sumifix Supra dyes)</i>	17
1.2.2.2	<i>Monofluorotriazine/vinylsulphone reactive dyes (Cibacron C dyes)</i>	20
1.2.2.3	<i>Vinylsulphone/α-Bromoacrylamide reactive dyes</i>	21
1.2.2.4	<i>Disulphide bis(Ethylsulphone) reactive dyes</i>	22
1.2.2.5	<i>Other heterobifunctional reactive dyes</i>	25
1.3	Neutral-Fixing Reactive Dyes (Kayacelon React dyes)	26
1.4	Salt free reactive dyes	28
1.5	Chromophoric system of reactive dyes	31
1.5.1	<i>Triphenyl dioxazine reactive dyes</i>	31

1.5.2	<i>Formazn reactive dyes</i>	32
1.5.3	<i>Phthalocyanine reactive dyes</i>	32
1.5.4	<i>Azo reactive dyes</i>	33
1.5.4.1	<i>Chlorine-fast azo dyes</i>	33
1.5.4.2	<i>Light-fast azo dyes</i>	35
1.5.4.3	Ureido reactive dyes	35
1.6	Cotton fiber	37
1.6.1	<i>Merphology of cotton fiber</i>	37
1.6.2	<i>Composition of cotton fiber</i>	38
1.6.3	<i>Properties of cotton fiber</i>	41
1.6.3.1	<i>Physical properties</i>	41
1.6.3.2	<i>Stability</i>	41
Chapter 2		
2	Expermental	43
2.1	Materials	43
2.2	Synthesis of ureido diamine intermediate I (diaminodiphenylurea DADPU)	43
2.3	Synthesis of disazo ureido reactive dyes	44
2.3.1	<i>bis(Dichlorotriazine) ureido reactive dyes 1, 2</i>	44
2.3.2	<i>bis(monochlorotriazine) ureido reactive dyes 3, 4</i>	45
2.3.3	<i>bis(monochlorotriazine/sulphatoethylsulphone) ureido reactive dye 5</i>	46
2.4	Synthesis of Polyazo ureido reactive dyes	46
2.4.1	<i>bis(monochlorotriazine) ureido reactive dye 6</i>	46

2.4.2	<i>bis(sulphatoethylsulphone) ureido reactive dye 7</i>	47
2.5	Dyes purification	48
2.6	Dyeing process by using synthesized reactive dyes	48
2.7	Measurements and analyses	49
2.8	Determination of dye exhaustion	50
2.9	Determination of dye fixation	51
2.10	Fastness testing	51
2.10.1	<i>Color fastness to washing</i>	51
2.10.2	<i>Color fastness to rubbing</i>	52
2.10.3	<i>Color fastness to perspiration</i>	52
2.10.4	<i>Color fastness to light</i>	53
Chapter 3		
3	Results and discussions	54
3.1	Dyes structures	54
3.2	Characterization of dye intermediate	55
3.3	Characterization of synthesized ureido dyes	55
3.4	Synthesis of Ureido diamine intermediate and ureido reactive dyes 1-7.	72
3.5	Dyeing performance and fastness properties of the synthesized ureido reactive dyes	77
3.5.1	<i>Effect of salt concentration and dyeing temperature Neutral exhaustion stage</i>	79
3.5.2	<i>Effect of sulphonic group</i>	80
3.5.3	<i>Effect of alkaline in secondary Exhaustion and Fixation stage</i>	86

3.5.4	<i>Effect of fixation dyeing temperature</i>	91
3.5.5	<i>Effect of dye concentration</i>	94
3.5.6	<i>Fastness properties of ureido reactive dyes</i>	98
3. 6	Conclusions	100
3.7	References	101
