

CONTENTS

CHAPTER ONE: INTRODUCTION.

1.1- Delimitation of the area	I
1.2- Physical features	I
1.3- Communications	3
1.4- Previous work	3
1.5- Objective and methods of study	6

CHAPTER TWO: GEOLOGIC SETTING AND PETROLOGIC STUDIES OF ROCK VARIETIES IN UMM ALAWI AREA.

2.1- Introduction	7
2.2- Metagabbro and gneissose diorite	7
A- Metagabbro	7
B- Gneissose diorite	9
2.3- Quartz diorite , granodiorite , adamellite association	10
A- Quartz diorite	10
B- Granodiorite	12
C- Adamellite	13
2.4- Quartz monzonite	15
2.5- Pegmatitic granite	17
2.6- Rutig volcanics	19
A- Conglomeratic variety	20
B- Rhyolitic tuff	20
C- Rhyodacite	20
D- Andesite	21
2.7- Ring dyke syenite	22
A- Porphyritic quartz syenite	24
B- Micrographic quartz syenite	24
2.8- Alkali feldspar granite	25
2.9- Geochemistry of the granitoid rocks	27
A- Introduction	27
B- Data analysis	28

CHAPTER THREE: FAULTS AND DYKES IN UMM ALAWI AREA.

3.1- Faults of Umm Alawi area	30
3.2- Dykes of Umm Alawi area	36
A- Phase I	38
B- Phase II	38

C- Phase III	39
D- Sandstone fracture filling	39
3.3- Petrography of representative dykes	40
A- Acidic dykes	40
a- Granophyre	40
b- Porphyritic rhyolite	40
B- Intermediate dykes	41
Andesite	41
C- Basic dykes	41
Dolerite and diabase	41
D- Sandstone	42
3.4- Statistical analysis of dykes	42

CHAPTER FOUR: RADIONETRIC INVESTIGATIONS AT UMM ALAWI AREA

4.1- Introduction	47
4.2- Field radiometric procedure	48
A- Working plan	48
B- General Consideration on field Radiometry..	48
a- Background determination	49
b- Calibration and Standardization	49
c- Solid angle effect	49
d- Rock absorption	50
e- Instrumentation	50
4.3- Determination of U and Th contents	52
A- Chemical analysis of Uranium	52
B- Chemical analysis of Thorium	53
C- Significance of U/Th ratio	54
D- Equilibrium and /or disequilibrium determination	55
4.4- Results and disscussion	56
A- Metagabbro	56
B- Quartz diorite	57
C- Granodiorite and adamellite	58
D- Quartz monzonite	59
E- Pegmatitic granite	60
F- Rutig volcanics	65

G- Ring dykes	65
a- Rhyodacite	65
b- Quartz syenite and syenite	66
H- Alkali feldspar granite	67
a- Coarse grained alkali feldspar granite.	67
b- Medium grained alkali feldspar granite.	68
I- Acidic dykes	74
J- Intermediate and basic dykes.....	75
K- Sandstone fracture filling	75
4.5- The state of equilibrium and/or disequilibrium	80
4.6- Radiometric anomalies	80
A- Uranium anomalies	85
B- Thorium anomalies	86
- SUMMARY AND CONCLUSIONS	87
- REFERENCES	92
- SUMMARY IN ARABIC
