

Contents

Chapter1. Introduction and Literature Survey

1.1 Introduction	1
1.2 Literature survey.....	5

Chapter 2. Theoretical Review

2.1 Solid electrolytes	20
2.1.1 Preparation of solid electrolytes	20
2.2 Polymer composites	25
2.2.1 Functional fillers	26
2.2.2 Electrical properties of polymer composites.....	27
2.2.3 Poly methyl methacrylate (PMMA).....	28
2.3 Electrical conductivity.....	29
2.3.1 Point defects.....	30
2.3.2 Ionic conductivity.....	31
2.3.3 Protonic conduction.....	36
2.4 Complex impedance.....	41
2.5 Dielectric properties.....	47
2.5.1 Sources of polarizability.....	47
2.5.2 Dielectric relaxation.....	48
2.5.3 Dipolar dispersion.....	50
2.6 Batteries.....	52
2.6.1 Elementary battery concepts.....	52
2.6.2 Hydrogen energy.....	52
2.6.3 Definition of metal hydride.....	53
2.6.4 Ni/MH battery.....	54

2.6.5 Electrochemical reaction in the Ni/MH battery.....	54
--	----

Chapter 3. Experimental Methods

3.1 Battery structure	56
3.1.1 Solid electrolyte preparation.....	56
3.1.2 Electrodes preparation	57
3.1.3 Battery configuration	57
3.1.4 Charge discharge set up.....	59
3.2 PMMA/alkali sulfate composite synthesise.....	59
3.3 X-Ray diffraction	60
3.4 Energy dispersive spectroscopy (EDAX).....	60
3.5 Thermal analysis	60
3.6 Infrared spectroscopy.....	61
3.7 NMR spectroscopy.	61
3.8 DC conductivity.	61
3.9 Impedance spectroscopy.	62

Chapter 4. Results and Discussion

4.1 Characterization of alkali sulfate based solid electrolytes	65
4.1.1 Structure of the alkali sulfate based solid electrolytes	65
4.1.2 Composition analysis.	68
4.1.3 Infrared spectroscopy.....	70
4.1.4 NMR spectroscopy.....	73
4.1.5 Calorimetric study.....	75
4.2 Electrical proprieties of alkali sulfate based solid electrolytes ...	77
4.2.1 DC conductivity	77
4.2.2 AC conductivity	80
i. Frequency dependence of the total conductivity.....	80
ii. Temperature dependence of the total conductivity.....	85

4.3 Dielectric properties.....	88
4.3.1 Frequency dependence of the dielectric parameters.....	88
4.3.2 Temperature dependence of the dielectric parameters.....	92
4.4 Complex impedance analysis.....	96
4.5 Electrical and dielectric prosperities of PMMA/alkali sulfate based solid electrolyte composites.....	103
4.5.1 AC conductivity	103
4.5.2 Dielectric properties	110
i) Frequency dependence of the dielectric parameters.....	110
ii) Temperature dependence of the dielectric parameters.....	113
iii) Complex impedance analysis of PMMA/alkali sulfat.....	118
4.6 Electrochemical properties of nickel/metal hydride battery using alkali sulfate based solid electrolyte	128
4.6.1 Discharge characteristics.....	128
4 .6.2 Self discharge characteristics.....	136
Conclusion.....	138
References.....	139
Appendix.....	145
Arabic summary
