INTRODUCTION	1
1. REVIEW OF LITERATURE	5
1.1. Seed borne fungi of groundnut	5
1.2. Seed borne fungi of corn	5
1.3. Definition of aflatoxins	7
1.4. Natural occurrence of aflatoxins (B ₁ , B ₂ , G ₁ and G ₂)	8
1.5. Structure and properties of aflatoxins (B ₁ , B ₂ , G ₁ and G ₂)	14
1.6. Types of aflatoxins and character of flatoxins B ₁	16
1.7. Toxicological effects of aflatoxin (B ₁ , B ₂ , G ₁ and G ₂)	16
1.7.1. Toxicological effect of aflatoxin B ₁ could be divided into the following two parts	32
1.7.1.1. Carcinogenisty of aflatoxin B ₁	32
1.7.1.2. Acute toxicity of aflatoxin	41
1.8. Character of AFT B ₁ LD ₅₀ of rats	42
1.9. Effect of acute and chronic toxicity on rats	42
1.10. Effect of amount of protein in diets on rats	44
1.11. Definition and effect of lipid peroxidation	44
1.12. Safety of antioxidant vitamins and β -carotene.	45
1.13. Vitamins E, C and other cartenoids as antioxidants.	46
1.14. Interaction among vitamin C, E and β -carotene.....	47
1.15. Antioxidant activity of ascorbic acid and α -tocopherol in vitro studies.	48
1.16. Roles of vitamins on aflatoxins contaminated diet.	49
1.17. Effect of vitamin E on aflatoxin	51
1.18. Effect of aflatoxin B ₁ on enzymes activities	52

1.19. Role of vitamin E in diets of rats	54
1.20. Effect of vitamin E on blood ALT, AST, GSH-Px activates	55
1.21. Biochemical changes of aflatoxicosis.	56
1.22. Histopathology of aflatoxicosis	57
2. MATERIALS AND METHODS	62
METHODS	62
2.1. Materials	62
2.1.1. Peanuts and corn	62
2.1.2. Aflatoxins standards	62
2.1.3. Thin layer chromatography (TLC) plates	62
2.1.4. Media	62
2.1.5. Aflatoxins production.....	63
2.1.6. Animals and diagnostic kits	63
2.2. Methods	64
2.2.1. Isolation of molds from tested foodstuff.	64
2.2.2. Identification of isolated molds	64
2.2.3. Maintenance of isolated molds	65
2.2.4. Aflatoxin extraction	65
2.2.4.1. From in vitro (fungal cultures)	65
2.2.5. Separation of aflatoxins	66
2.2.5.1. Thin layer chromatography (TLC) technology	66
2.2.5.2. Confirmation test	66
2.2.6. Detection of aflatoxins	66
2.2.6.1. Calculation of aflatoxins	67
2.2.7. Toxicological studies of aflatoxins B ₁	68
2.2.7.1. Animals (Experimental animals) for first experiment	68
2.2.7.2. Experimental design for first experiment	68

2.2.7.3. Animals (experimental animals) for second experiment	69
2.2.7.4. Experimental design for aflatoxin B ₁ for second experiment	69
2.2.8 Biochemical analysis	72
2.2.8.1. Blood sampling	72
2.2.8.2. Organs	72
2.2.8.3. Determination of serum total protein	72
2.2.8.4. Determination of total cholesterol	72
2.2.8.5. Determination of urea	73
2.2.8.6. Determination of total bilirubin	73
2.2.8.7. Determination of creatinine	73
2.2.8.8. Determination of serum transaminases (AST and ALT)	74
2.2.9. Histopathological technique	74
2.2.10. Statistical analysis	75
3. RESULTS AND DISCUSSION	76
3.1. Fungi isolated from seeds sample of peanut	76
3.2. Fungi isolated from grains sample of corn	77
3.3. Screening of aflatoxin production by various isolates of fungi, isolated from peanut and corn grown in liquid medium	77
3.4. Biochemical observation.	78
3.4.1. Effect on activities of plasma enzymes (ALT, AST, ALP).	79
3.5. Biochemical analysis of blood of rats which injected with aflatoxin B ₁	79
3.5.1. Change in total protein	80
3.5.2. Change in total cholesterol	80

3.5.3. Change in bilirubin and urea	80
3.5.4. Change in creatinine and plasma enzymes(ALT & AST)	80
3.6. Histopathological changes	100
3.6.1. Rats liver	100
3.6.2. Rats kidney	102
3.6.3. Rats heart	104
3.6.4. Rats spleen	104
3.6.5. Rats lung	104
3.6.5. Rats brain	105
3.7. Discussion of histopathology	105
3.7.1. Effect on body weight and some organs of rats	105
3.7.2. The control group (-ve AFT)	107
3.7.3. Group of AFB ₁ only	107
3.7.4. Effect of supplementation the contaminated diet with vitamins on rats.	107
4. SUMMARY	109
5. REFERENCES	111
6. ARABIC SUMMARY	1

LIST OF TABLES

Table No.	Title	Page
Table (1)	: Basal diet composition (standard diet)	70
Table (2)	: Composition of mineral mixture	70
Table (3)	: Composition of vitamin mixture.	71
Table (4)	: Show genera of fungi isolated from grains sample of ground nut (peanut)	82
Table (5)	: Show genera of fungi isolated from grains sample of corn (<i>Zea mays</i>)	83
Table (6)	: Screening of aflatoxin production by various isolates of fungi isolated from peanut and corn grown in liquid medium (YES).	84
Table (7)	: Effect of vitamins supplementation on body and some organs weight of male rats fed on aflatoxins contaminated diet.	85
Table (8)	: Effect of vitamins supplementation on the activity of plasma alkaline phosphatase (ALP) of male rats fed on diet contaminated with aflatoxins for one month.	87
Table (9)	: Effect of vitamins supplementation on the activity of plasma alanine amino-transferase (ALT) of male rats fed on diet contaminated with aflatoxins for one month.	89
Table (10)	: Effect of vitamins supplementation on the activity of plasma aspartate amino-transferase (AST) of male rats fed on diet contaminated with aflatoxins for one month.	90

Table No.	Title	Page
Table (11)	: Effect of vitamins supplementation on the activity of blood urea nitrogen (BUN) of male rats fed on diet contaminated with aflatoxins for one month.	91
Table (12)	: Effect of vitamins supplementation on the creatinine level of male rats fed on diet contaminated with aflatoxins for one month.	92
Table (13)	: Effect of aflatoxin B ₁ on plasma total cholesterol of albino male rat injected aflatoxin B ₁ interperitoneal (IP) twice a week for one month.	93
Table (14)	: Effect of aflatoxin B ₁ on total protein in albino male rat injected aflatoxin B ₁ interperitoneal (IP) twice a week for one month.	94
Table (15)	: Effect of aflatoxin B ₁ on bilirubin of albino male rat injected aflatoxin B ₁ inerpreitoneal (IP) twice a week for one month.	95
Table (16)	: Effect of aflatoxin B ₁ on urea of albino male rat injected aflatoxin B ₁ interperitoneal (IP) twice a week for one month.	96
Table (17)	: Effect of aflatoxin B ₁ on creatinine of albino male rat injected aflatoxin B ₁ interperitoneal (IP) twice a week for one month.	97
Table (18)	: Effect of aflatoxin B ₁ on (AST) aspartate aminotransferase of albino male rat injected aflatoxin β_1 interperitoneal (IP) twice a week for one month.	98
Table (19)	: Effect of aflatoxin B ₁ on (ALT), alanine aminotransferase of albino male rat injected aflatoxin B ₁ interperitoneal (IP) twice a week for one month.	99

LIST OF FIGURES

Fig. No.	Title
Fig. (1)	Show genera of fungi isolated from seeds sample of peanut (<i>Arachis hypogaea</i> L.).
Fig. (2)	Show genera of fungi isolated from grains sample of corn (<i>Zea mays</i>).
Fig. (3)	Effect of vitamins supplementation on body and some organs weight of male rats fed on aflatoxins contaminated diet (Mean \pm S.E).
Fig. (4)	Effect of vitamins supplementation on the activity of plasma alkaline phosphatase (ALP) of male rats fed on diet contaminated with aflatoxins for one month (Mean \pm S.E).
Fig. (5)	Effect of vitamins supplementation on the activity of plasma alanine amino-transferase (ALT) of male rats fed on diet contaminated with aflatoxins for one month (Mean \pm S.E).
Fig. (6)	Effect of vitamins supplementation on the activity of plasma aspartate aminotransferase (AST) of male rats fed on diet contaminated with aflatoxins for one month (Mean \pm S.E).
Fig. (7)	Effect of vitamins supplementation on the activity of blood urea nitrogen (BUN) of male rats fed on diet contaminated with aflatoxins for one month (Mean \pm S.E).
Fig. (8)	Effect of vitamins supplementation on the creatinine level of male rats fed on diet contaminated with aflatoxins for one month (Mean \pm S.E).
Fig. (9)	Effect of aflatoxin B ₁ on plasma total cholesterol of albino male rats injected aflatoxin B ₁ interperitoneal (IP) twice a week for one month.

Fig. (10)	Effect of aflatoxin B ₁ on total protein of albino male rats injected aflatoxin B ₁ interperitoneal (IP) twice a week for one months.
Fig. (11)	Effect of aflatoxin B ₁ on bilirubin of albino male rats injected aflatoxin B ₁ interperitoneal (IP) twice a week for one month.
Fig. (12)	Effect of aflatoxin B ₁ on urea of albino male rats injected aflatoxin B ₁ interperitoneal (IP) twice a week for one month.
Fig. (13)	Effect of aflatoxin B ₁ on creatinine of albino male rats male injected aflatoxin B ₁ interperitoneal (IP) twice a week for one month.
Fig. (14)	Effect of aflatoxin B ₁ on (AST) asparate amino-transferase of albino male rats injected aflatoxin B ₁ interperitoneal (IP) twice a week for one month.
Fig. (15)	Effect of aflatoxin B ₁ on (ALT) alanine aminotransferase of albino male rats male injected aflatoxin B ₁ interperitoneal (IP) twice a week for one month.

LIST OF PHOTO

Fig. No.	Title
Photo (1)	Control liver of rat (Hx. & E.; x 100).
Photo (2)	Liver of rat injected with aflatoxin B ₁ showing bile ductal hyperplasia (H), fibrous connective tissue proliferation (CT) and few mononuclear cellular aggregation in the portal area (MNC) (H & E. stain x 200).
Photo (3)	Liver of rat injected with aflatoxin B ₁ showing pyknosis of nuclei of hepatocytes (arrows) (H & E. stain x 200).
Photo (4)	Liver of rat injected with aflatoxin B ₁ showing hydropic degeneration of hepatocytes with enlargement of some nuclei (arrows) (H. & E. stain x 200).
Photo (5)	Liver of rat injected with aflatoxin B ₁ showing congestion of sinusoids (arrows) (H. & E. stain x 200).
Photo (6)	Liver of rat injected with aflatoxin B ₁ showing fatty degeneration of hepatic cells (arrows). (H. & E. stain x 200).
Photo (7)	Control kidney of rat fed on standard diet without aflatoxin B ₁ showing normal renal cortical tissue. Observe the normal glomerulus (G) and convoluted tubules (RT). (H. & E stain x 100).
Photo (8)	Kidney of rat injected with aflatoxin B ₁ showing disintegration and desquamation of the tubular epithelium (arrows). Notice pyknosis of some nuclei (N). (H. & E. stain x 200).
Photo (9)	Kidney of rat injected with aflatoxin B ₁ showing coagulative necrosis of the renal tubules evidenced by pyknosis of nuclei, highly eosinophilia of cytoplasm and loss of cell outlines. (H. & E. stain x 200).

Fig. No.	Title
Photo (10)	Kidney of rat injected with aflatoxin B ₁ showing glomerular hypercellularity (G) and congestion (H. & E stain x 200).
Photo (11)	Control lung of rat showing normal pulmonary parenchyma formed from respiratory bronchioles and alveoli (H. & E. stain x 200).
Photo (12)	Lung of rat injected with aflatoxin B ₁ showing accumulation of pink homogenous exudate (ex) mixed with mononuclear inflammatory cells (MNC) inside the pulmonary alveoli (H. & E. stain x 200).
Photo (13)	Lung of rat injected with aflatoxin B ₁ showing desquamation of the lining epithelium of the branchiol (arrows) (H. & E. stain x 200).
Photo (14)	Lung of rat injected with aflatoxin B ₁ showing thickening of blood vessel walls (arrows) with perivascular lymphocytic cellular aggregation (L). (H. & E. stain 200).
Photo (15)	Lung of rat injected with aflatoxin B ₁ showing focal areas of compensatory alveolar emphysema (Em) with focal lymphocytic cellular infiltration of the pulmonary tissues (arrow) (H. & E. stain x 200).

LIST OF ABBREVIATION

FAO	Food Agricultural Organization
AFTB₁	Aflatoxin B ₁
AFTB₂	Aflatoxin B ₂
AFG₁	Aflatoxin G ₁
AFG₂	Aflatoxin G ₂
AF	Aflatoxin
TLC	Thin Layer Chromatography
UV	Ultraviolet
µg/kg	Microgram / kilogram
AST	Aspartate Aminotransferase
ALT	Alanine aminotransferase
IU/Kg	International Units / kilogram
GSH-PX	Glutathione peroxidase
BHA	Butylated hydroxyanisole
BHT	Butylated hydroxytoluene
GT	Green tea
AFM	Aflatoxin
AFL	Aflatoxinol
LD₅₀	Lethal dose for 50 % of animal test populations
Se	Selenium
Mg/kg B.W	Milligram / kilogram Body Weight
SGOT	Serum Glutamic Oxaloacetic transaminase
GOT	Glutamic oxaloacetic transaminase
OCT	Ornithine carbamyl transferase
IDH	Isocitric dehydrogenase
ALP	Alkaline phosphate

PUFA	Polyunsaturated fatty acids
LDL	Low-density lipoprotein
AFT	Aflatoxin
YES	Yeast extract sucrose
g/L	Gram/Litre
PDA	Potato dextrose agar
CHE	Cholesterol esterase
CHOD	Cholesterol oxidase
MDH	Malate dehydrogenase
LDH	Lactate dehydrogenase
LSD	Least significant different
Vit.	Vitamin
BUN	Blood Urea Nitrogen
S.E.	Standard error
IP	Interperitoneal
X	Mean

Acknowledgement

*First and Forever, ultimate thanks to **ALLAH** The most beneficent and merciful and without his aid this work could not be done.*

*I would like to express my sincere gratitude and appreciation to Late **Prof. Dr. Hussein Yousry. Olama**, Professor of Botany , Faculty of Science, Benha University, for his valuable criticism, reading the manuscript, supervision and valuable help.*

*I am greatly indebted to **Prof. Dr. Saeb Abd El-Monem Hafez** Professor of Nutrition, Institute Food Technology, Agricultural Research Center, Giza for his closed supervision, encouragement, guidance, valuable advice, his unlimited help during preparation and constant encouragement.*

*I also wish to express my great thanks to **Dr. Talaat Ibrahim El-Sayed**, Assistant Professor of Microbiology, Botany Department, Faculty of Science, Benha University, for supervising the work, his careful guidance, continuous constructive criticism and valuable discussions during the course of this investigation and for the revision of the manuscript. I will always be indebted to him for his constant encouragement.*

*I also wish to express my great thanks to **Dr. Mahmoud Moustafa Amer**, Assistant Professor of Microbiology, Botany Department, Faculty of Science, Benha University, for his valuable criticism, reading the manuscript, supervision, valuable help and constant encouragement.*

Finally, I would like to express my thanks to every one who had participated some way or another in the conduction of this study.
