
Some lines for treatment of chronic bacterial prostatitis

Abdel-Alim Mohamed Abdel-Khalek El-Lory

No doubt that over population problem is one of the greatest problem all over the world in this investigation we have studied the acceptability of different birth control methods in dakkahlia governorate which is considered the 2nd governorate according to its population it is located on either side of damiatta branch of the Nile it consists of 10 cities and 433 villages. On reviewing the different birth control methods we find that the most effective one is not the safest and the safest is not 100% effective. On questioning women in the family planning centres.
